

Assembly Guide

SHEET CABINET

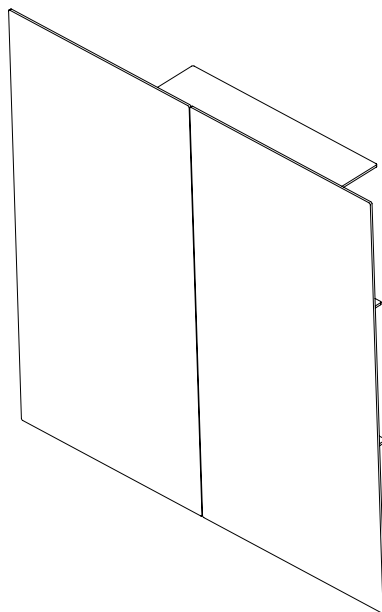

Designed by Bjørn van den Berg

FRAMA

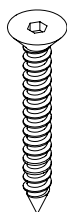

Designed to exist at the intersection between a shelf and a cabinet, Sheet Cabinet offers both storage and display. Wall-mounted clean lines in stainless steel.

SHEET CABINET

- PARTS -

Ⓐ Cabinet

Ⓑ Screw x3

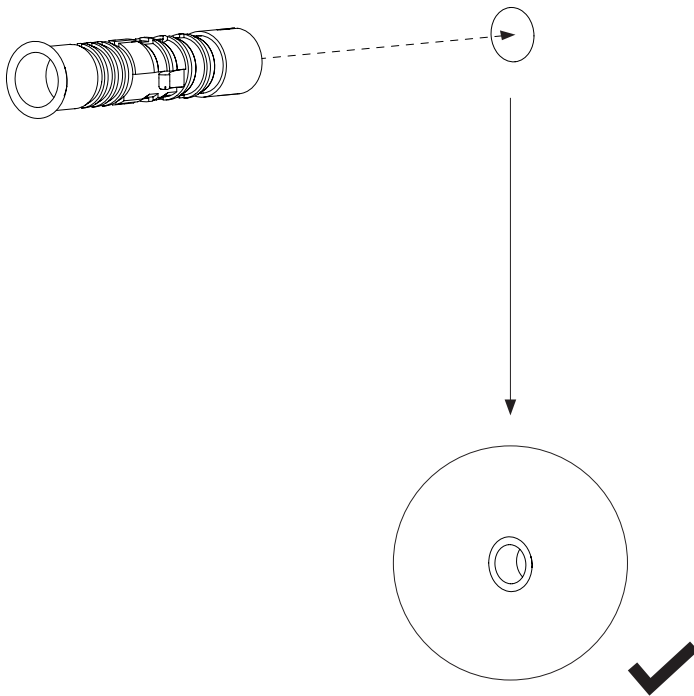

Ⓒ Wall Plug x3

1.

Begin by drilling the top hole in the wall at the desired height.

Insert the Wall Plug ③ securely into the hole.

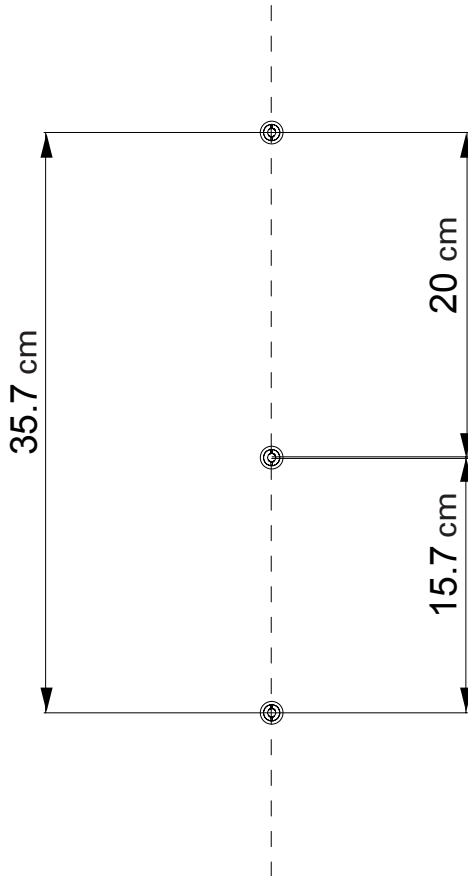

Due to the weight of the Cabinet, we strongly recommend mounting it on a solid wall. Avoid installing on hollow or lightweight partition walls, as they may not support the load safely.

NOTE: Each shelf can support up to 12 kg when the cabinet is wall-mounted.

2.

Drill the two bottom holes, making sure they are properly aligned and spaced at the correct distance from each other. Insert the remaining Wall Plugs ③ into the holes.

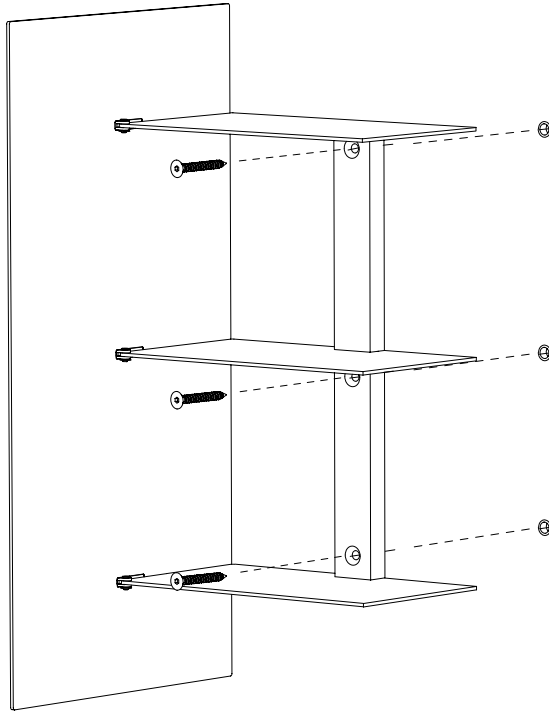

NOTE: Each shelf can support up to 12 kg when the cabinet is wall-mounted.

3.

Once the Wall Plugs (C) are correctly aligned and positioned at the proper distance, lift the Cabinet (A) and place it against the wall.

Insert the screws (B) through the mounting holes and into the Wall Plugs to secure the Cabinet in place.

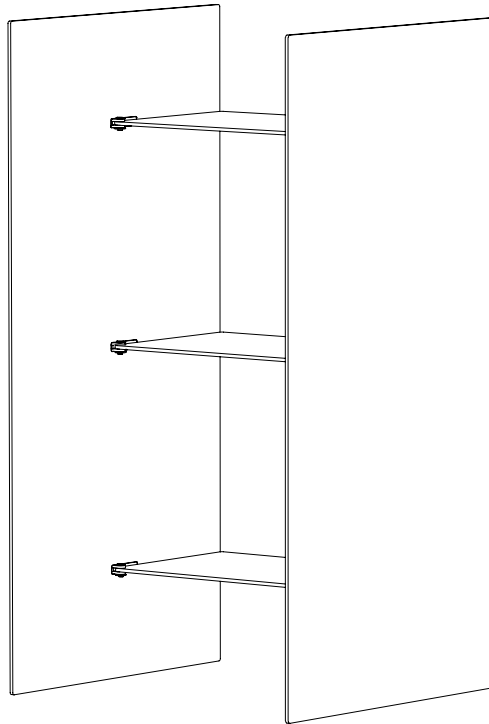

Note: This step may require two people to ensure safe and accurate installation.

NOTE: Each shelf can support up to 12 kg when the cabinet is wall-mounted.

4.

The Cabinet (A) is now properly installed.

NOTE: Each shelf can support up to 12 kg when the cabinet is wall-mounted.

- Care & Maintenance Guide -

In order to preserve your new FRAMA pieces for years to come, we've produced a guide on the materials we use and how to best care for them. Following these instructions will help to maintain the appearance and quality of your items after repeated use and cleaning.

For material care and maintenance instructions, scan the QR code using your mobile device.
