BACKFLIP WALL BRACKET

Design by Gudmundur Ludvik

Please identify your wall type before mounting and choose the appropriate fastening hardware. If in doubt, consult a professional.

When properly mounted to the wall, it can hold a maximum of 2 chairs.

Follow the illustrated guide on the opposite side of this page along with this written guide.

- 1 Mark the positions for the drill holes.
- 2 Drill the holes using a drill bit that matches the size of your screws or wall plugs. Consult a professional if in doubt.
- 3 Identify your wall type. If it is a brick wall or solid concrete, use appropriate wall plugs and the correct type of fastening. Consult a professional if in doubt.
- 4 Insert screws. Leave a 2 mm (0.079") gap for the hanger to hang on.
- 5 Mount the hanger onto the screws.
- 6 Push the wall bracket downwards so that it locks into place. Make sure the screws slide into the designated cut-outs.

Our Care & Maintenance offers guidance for optimal maintenance of your HAY product. It includes advice and instructions on cleaning and caring for specific materials to prolong the life of your furniture.
