

Storage Chest

Congrats on your new Storage Chest!

We hope very much that you are going to be happy with your new Storage Chest for many years to come. In the following pages you will find out how to assemble and look after your new piece of furniture.

Product Description

SStorage Chest is made for the things you want close at hand, but not lying around. Use it for blankets, cushions, magazines, toys or other everyday objects.

With its lid and low format, it can also be used as a coffee table with hidden storage inside, at the foot of a bed, or wherever you need storage that works naturally as part of the room.

Just like most other MOEBE products, Storage Chest is component based and you can assemble and disassemble it again – as many times as you like.

Assembly

Please see the following assembly instructions or find them at www.moebe.dk

Taking care of your new Storage Box

If at any time the wood displays lighter dry patches, we recommend you apply a thin coat of oil to the chest with a clean lint-free cloth to nourish the wood. Small cans of pigment-free furniture oil are available from most DIY or hardware stores. Do not use oils sold for cooking or eating.

Any spills must be removed immediately using a cloth. Dust can be removed with a damp cloth. Light stains may be removed by gently rubbing in the direction of the grain with 400 grit (very fine) sandpaper and re-oiling afterwards.

5 Year Warranty

We believe in what we do and in the quality of our products. That's why we give you a 5 year warranty. This guarantee covers any functional, material or manufacturing defect on any product you buy from us for private use.

Spare parts - Keep it going forever

All our products are component based and have been designed this way to make repairs simple. You can find and purchase all spare parts for your product on www.moebe.dk for a period of at least 5 years after your purchase. It should always be cheaper and easier to repair, than buying new.

Recycling

Whilst we hope that your MOEBE Storage Chest will serve you well for many years to come, if you do at some point wish to recycle it then it is easy to do so. Simply split the product down into its separate parts and recycle them by material.

All parts can be recycled. How this is done depends on local regulations and facilities.
