

Lounge Chair

Congrats on your new Lounge Chair!

We hope that you are going to be happy with your new Lounge Chair for many years to come.

Assembly:

Please see the following assembly instructions or find them at www.moebe.dk

Taking care of your Lounge Chair:

Wood

All wooden parts have been treated with oil and hard wax. This treatment helps protect the wood from absorbing liquids. However, please note that oil and wax do not provide a 100% sealing treatment, unlike, for instance, a lacquered finish. As a result, the wood needs to be treated with care. If you spill liquid on the surface, please ensure that you remove it immediately to avoid stains. The wooden parts of the chair should be cleaned with a damp cloth, using a mild detergent if needed.

To refresh the wooden parts, you can apply a new layer of oil. Any clear furniture oil will work, but make sure to follow the specific instructions for the product you choose. If the surface becomes scratched or rough, you can sand it lightly with fine-grit sandpaper before applying oil. Always sand in the direction of the wood grain, and keep in mind that the seat plate and side and back panels are veneered, so sanding must be done gently.

Fabrics

Polyester care

To keep your polyester chair in good condition, vacuum it weekly using a soft brush attachment to remove dust and dirt. For spills, blot the area immediately with a dry cloth, taking care not to rub the fabric. For tougher stains, use a mild soap solution, then blot with a damp cloth to remove any residue, and allow the area to air dry. Keep the chair out of direct sunlight to prevent fading, and avoid using harsh chemicals or abrasive cleaners to protect the fabric.

Wool care

For wool upholstery, vacuum regularly with a soft brush attachment to prevent dust and dirt from becoming embedded in the fabric. For stains, blot immediately with a dry cloth and gently dab with a solution of mild wool detergent. Avoid rubbing the fabric, and allow the spot to air dry. Keep the chair away from direct sunlight and heat sources, and avoid soaking the fabric with water to prevent shrinkage.

For thorough cleaning, remove the fabric covers and follow the care label for your specific fabric. For wool covers, consult a dry cleaner. If in doubt, please reach out to us and we will help you out.

Leather

Leather is a natural material that develops character with use. Remove dust regularly with a soft, dry cloth or a vacuum cleaner with a soft brush attachment. Blot spills immediately with a clean, dry cloth without rubbing. Avoid soaking the leather, and keep the chair away from direct sunlight and heat sources. Do not machine wash leather covers or use household detergents, solvents, oils or polish. For stubborn stains, or before applying leather-care products, please contact us for advice suited to your leather.

5 Year Warranty

We believe in what we do and in the quality of our products. That's why we give you a 5 year warranty. This guarantee covers any functional, material or manufacturing defect on any product you buy from us for private use.

Spare parts · Keep it going forever

All our products are component based and have been designed this way to make repairs simple. You can find and purchase all spare parts for your product on www.moebe.dk for a period of at least 5 years after your purchase. It should always be cheaper and easier to repair, than buying new.

Recycling

Whilst we hope that your MOEBE Lounge Chair will serve you well for many years to come, if you do at some point wish to recycle it then it is easy to separate. Simply split the product down into its separate parts and sort them by material.

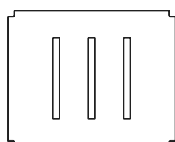

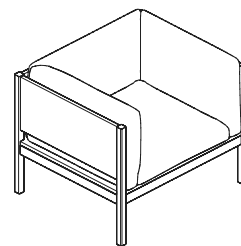

Recycling options depend on local regulations and facilities.

The seat plate and side and back panels are made of MDF board with an oak veneer. Please remove all metal fittings before recycling. The legs are made of solid oak; please also remove any metal fittings from these.

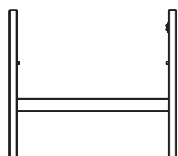

Upholstery materials depend on your chosen fabric or leather. Separate the covers, foam filling and polyester wadding, and follow local guidance for each material.
