Glitter Tattoos Mega Pack

MADE WITH
COSMETIC
Bio-glitter®

Create **FAB**
Glitter Tattoos & Sparkly Nails

WARNING!

Only for use by children over 8 years old.

Not suitable for children under 36 months due to small parts that may represent a choking hazard. Adult supervision is recommended. Read the instructions before use, follow them and keep them for reference.

We recommend testing by applying adhesive, nail varnish or metallic tattoo to a small area of the arm and leaving for 1/2 hour before applying tattoos. If the adhesive causes redness, inflammation, or soreness, wash off immediately and do not apply glitter tattoos to your skin. Keep away from eyes. Do not apply glue or glitter close to the eyes or mouth. Do not swallow or inhale the glue or glitter.

Use contents within 6 months of opening the individual containers.

In case of an adverse reaction, wash off immediately with soap and water, and rinse the affected area well with plenty of clean water. If swallowed: Do not induce vomiting. Drink some fresh water and seek medical advice should you suffer any symptoms. Keep away from eyes. In case of eye contact: Wash out eye with plenty of water, holding eye open. Seek immediate medical advice: Clean any spills with kitchen paper and clean water. Dispose of any surplus materials in the household waste.

Advice for supervising adults:

This toy is for use only for children over the age of 8 years. Read and follow these instructions, the safety rules and the first aid information and keep them for reference. Incorrect use of chemicals can cause injury and damage to health. Only carry out those activities which are listed in the instructions. Because children's abilities vary so much, even within age groups, supervising adults should exercise discretion as to which activities are suitable and safe for them. The instructions should enable supervisors to assess any activity to establish its suitability for a particular child. The supervising adult should discuss the warnings, safety information and the possible hazards with the child or children before commencing the activities. The area surrounding the activity should be kept clear of any obstructions and away from the storage of food. It should be well lit and ventilated and close to a water supply. The working area should be cleaned immediately after carrying out the activity.

INGREDIENTS:

Metallic Tattoos: Ethylene/Acrylic Acid Copolymer, Cellulose Acetate Butyrate, Dipropylene Glycol Dibenzoate, Paraffinum Liquidum (Mineral Oil), Sucrose Acetate Isobutyrate, Acetyl Tributyl Citrate, Isobornyl Acrylate, Polyvinyl Butyral, Polyethylene Terephthalate, Polyurethane-9 [+/- May Contain: Aluminium Powder (CI 77000), Copper Powder (CI 77400), Iron Oxides (CI 77499)].

Cosmetic Glue: Water (Aqua), Polyvinyl Alcohol, Glycerin, Polyvinylpyrrolidone, Talc, Triethanolamine, Carbomer, Phenoxyethanol, Sodium Benzoate, Titanium Dioxide (CI 77891).

Glitter: Rayon, Glycerin, Styrene/Acrylate Copolymer, Water (Aqua), Urea. [+/- May Contain: Yellow 5 (CI 19140), Aluminium Powder (CI 77000), Red 7 (CI 15850), Blue 1 (CI 42090)].

Glitter Nail Polish: Styrene/Acrylates Copolymer, Water (Aqua), Polyethylene Terephthalate, Stearalkonium Bentonite, Propylene Glycol, Phenoxyethanol, Caprylhydroxamic Acid, Sodium Benzoate, Red 7 (CI 15850), Iron Oxide (CI 77492), Blue 1 (CI 42090).

Contents

- 4 x Sheets of Metallic Tattoos
- 25 x Stencil Sheets
- 6 x Pots of Coloured Bio-Glitter® (Blue, Gold, Red, Pink, Green, Purple)
- Eco-friendly cosmetic Bio-Glitter© designed to biodegrade quickly and safely in natural freshwater environments)
- 3 x Glittery Nail Varnishes (Blue, Gold, Red)
- 1 x Cosmetic Glue
- 1 x Soft Paint Brush
- 1 x Stiff Paint Brush
- 1 x Toe Separator
- 1 x Emery Board

Instructions

Glitter Tattoos Mega Pack

Applying a Glitter Tattoo

Make sure that the area of skin to which you are applying the tattoo is clean and dry. It is particularly important to remove any make-up or residues from oily skin creams before applying glitter tattoos.

Choose a design, and carefully peel the backing paper from the stencil. Position the stencil on the skin, and press it gently into place, ensuring that there

4

are no creases or air bubbles in the stencil (it is much easier to apply Glitter Tattoos to flat areas of the body than to curved areas).

Shake the glue bottle, then unscrew the lid and use the brush in the lid to apply a thin coat of the cosmetic glue to the whole cut-out area of the stencil, overlapping the glue by about 2mm onto the edges of the stencil.

Let the glue dry slightly for 30 seconds before applying the glitter.

Unscrew the lid of the pot for the chosen colour of glitter and remove the plastic insert.

Use the soft brush to pick up the particles of glitter and very gently dab these onto the glue, trying not to get glue on the brush.

5

As soon as you have covered the glue area with glitter, carefully peel the stencil off the skin, leaving the glitter tattoo behind. Do not wait for the glue to dry fully.

Top Tip:
If the edges of the tattoo start to lift with the stencil, you can dab them gently with the soft brush to make sure that the tattoo breaks neatly along the edges of the stencil.

Use the stiffer brush to gently brush away any excess glitter which may have stuck to your skin.

You can also make multi-coloured tattoos by applying glitter to a selected area of the glued stencil, then tapping the glitter off the soft brush and applying a second colour to another area. You need to have all your glitters ready before doing this, as the glue dries quite quickly!

Removing Glitter Tattoos

Glitter Tattoos can be washed off the skin with soap and warm water. Soaking the Glitter Tattoo in warm water (such as in the bath or shower) for a few minutes will soften the glue and make them easier to wash off.

After removal it is a good idea to apply skin moisturiser to the area where you had the Glitter Tattoo.

Use the small stencils on your fingers to make ring tattoos!

Glitter Nails

Wash your hands and nails well, making sure to remove any dirt under your nails using soap, a nail brush and warm water.

Trim your nails with a finger-nail cutter if they are too long, and file them gently using the nail file supplied to remove any sharp edges. Only file the tip of the nail, not the top surface, as filing the top surface will weaken the nail.

After filing your nails, always wash and thoroughly dry your hands to make sure that nail dust cannot spoil your nail polish.

Painting Your Nails - Base Coat

Always shake the nail polish before use to ensure that the colours are evenly mixed. For best results you should paint your nails with smooth, continuous strokes of the brush,

starting at the base of the nail (the cuticle) and painting towards the tip of the nail in a single stroke, using the brush supplied inside the lid of each nail polish. After dipping the brush in the nail polish, wipe the brush on the inside of the bottle neck to remove the excess paint and form the bristles of the brush into a good shape.

You should be able to paint smaller nails in two strokes of the brush, as shown:

Larger nails will need three strokes of the brush:

It is better to apply several thin coats of nail polish, rather than one thick coat, because this will produce a more even application. Most colours will only need two coats, but light colours may need three coats. Allow each coat to dry before applying the next coat - if you apply the next coat too soon, the nail polish may lack gloss, or become streaky.

If you make a mistake, wait for the nail polish to dry, peel it off the nail (or wash it off the nail with soap and warm water), dry the nail and start again.

Applying a Metallic Tattoo

Applying FabLab Metallic Tattoos is super easy!

First choose a metallic tattoo, then cut out the tattoo keeping as close to the design as possible.

Decide where you would like to apply your tattoo. Before application, make sure your skin is clean, dry and free of oils or makeup.

See our full range of toys and gifts at:
www.playmonster.co.uk

When you're ready to apply the design, remove the clear top sheet from the tattoo and carefully press the tattoo firmly onto your skin with the design facing down.

Run a sponge under water so it is damp, but not dripping. Dab the sponge against the tattoo to saturate the entire paper backing.

Then holding the damp sponge against the back of the tattoo press down and hold for thirty seconds.

Very gently peel off the backing paper by taking hold of one corner first. Slowly and smoothly peel the paper away from your skin. Let the area dry completely.

Removing Metallic Tattoos

Keep in mind that metallic tattoos are designed to withstand soap and water, so have these tattoo removal tips handy. Apply baby oil or skin moisturiser to the tattoo, and leave for 5 minutes before washing off the tattoo with soap and warm water.

An alternative way to remove your tattoo is with soap and water. It will take a little bit of rubbing but it will come right off.

After removal it is a good idea to apply skin moisturiser to the area where you had the Metallic Tattoo.

Have fun applying metallic tattoos to your arms, wrists and hands!

Mobile Phone Holder

Included in your Fablab kit is a mobile phone holder, which lets you easily view our cool "how-to" videos packed with exciting content to discover new techniques and styles.

Simply place your phone into the holder and go to our channel at **youtube.com/fablabuk**.
