Instructions

Hairlights

Create **FAB**
Temporary Hairlights

WARNING!

Only for use by children over 8 years old.

Not suitable for children under 36 months due to small parts that may represent a choking hazard. Adult supervision is recommended. Read the instructions before use, follow them and keep them for reference. We recommend testing by applying Hairlights to a small area of skin on the arm and leaving for ½ hour before applying to the hair. If the Hairlights causes redness, inflammation, or soreness, wash off immediately and do not apply Hairlights to your hair. Do not apply close to the eyes or mouth. Do not swallow or inhale Hairlights. Use contents within 6 months of opening the individual containers. In case of an adverse reaction, wash off immediately with soap and water, and rinse the affected area well with plenty of clean water. If swallowed: Do not induce vomiting. Drink some fresh water and seek medical advice should you suffer any symptoms. In case of eye contact: Wash out eye with plenty of water, holding eye open. Seek immediate medical advice. Clean any spills with kitchen paper and clean water. Dispose of any surplus materials in the household waste.

Advice for supervising adults

This toy is for use only for children over the age of 8 years. Read and follow these instructions, the safety rules and the first aid information and keep them for reference. Incorrect use of chemicals can cause injury and damage to health. Only carry out those activities which are listed in the instructions. Because children's abilities vary so much, even within age groups, supervising adults should exercise discretion as to which activities are suitable and safe for them.

The instructions should enable supervisors to assess any activity to establish its suitability for a particular child. The supervising adult should discuss the warnings, safety information and the possible hazards with the child or children before commencing the activities.

The area surrounding the activity should be kept clear of any obstructions and away from the storage of food. It should be well lit and ventilated and close to a water supply. A solid table with a heat resistant top should be provided. The working area should be cleaned immediately after carrying out the activity.

Ingredients:

Talc; Mica; Ethylhexyl Palmitate; Magnesium Stearate; Polybutene; Phenoxyethanol; Ethylhexylglycerin; Caprylyl Glycol; May contain +/- D & C Red 7 Calcium Lake; FD & C Yellow 5 Lake; FD & C Blue 1 Lake; D&C Red No. 27; Ultramarines Blue; Lake Quinoline Yellow; D&C Red No. 6 Sodium Salt; Titanium Dioxide; Iron Oxide.

Contents

6 x Coloured Hair Chalks (Blue, Yellow, Pink, Purple, Turquoise, Coral)

1 x Pair of Laboratory gloves

2 x Hairdressers' Hair Clips

Instructions

Hairlights

Applying Hairlights

Choose colours which contrast with your hair. If you have very dark hair, lighter colours will stand out more, whereas darker colours will stand out better in blonde hair.

Although the Hairlights product will wash out of your hair easily, it can stain the skin, so always wear the gloves provided when applying Hairlights.

It is best to apply Hairlights little by little, so select a small section of hair and separate it with a hairdresser's clip.

Open the container and gently rub the Hairlights down the length of hair that you want to colour. Repeat this action several times, always going from top to bottom. The more you repeat this action, the more colour will be left on your hair.

Dip Dye

To create multi-colour dip dye in your hair, start at the bottom of your hair. Put the hairdresser's clips where you want your first colour to start, about 4 - 5cm from the bottom of your hair works well. Apply the first colour, covering all the strands with colour, then move the clips up to where you want the second colour to begin and colour the hair between the clips and the first colour.

Streaks

You can colour streaks in your hair by repeating this process with different colours on different strands of hair.

Top Tip:
Using one colour of hair shadow to create vibrant coloured highlights!

Once you have covered all the hair in the second colour, move the clips up again to where you want your third colour to start. Colour this section between the clips and the second colour evenly.

Get a friend to help if you have trouble reaching the back!

Top Tip:
Use one colour to
create an Ombre look!

Plaiting

Plaiting either streaks of colour or 'dip dye' hair can give a whole new look to your hair!

Straightening & Curling

You can curl or straighten your hair either before or after applying colour.

Hair Spray

Hair Spray can be applied over Hairlights to help maintain the colour in your hair until you wash it out.

Removing Hairlights

Hairlights will wash out of your hair using normal hair shampoo and warm water.

Mobile Phone Holder

Included in your Fablab kit is a mobile phone holder, which lets you easily view our cool "how-to" videos packed with exciting content to discover new techniques and styles.

Simply place your phone into the holder and go to our channel at [youtube.com/fablabuk](https://www.youtube.com/fablabuk).
