

Adjust and Polish Zirconia and Lithium Disilicate the **eZr** Way!

eZr Intra-oral **Adjustment:**

- **No chatter, chipping or microfracture** - Unlike diamonds bonded directly to a hard metal shaft, eZr's rubber substrate cushions the diamonds to prevent damage to the restoration.
- **No heat build-up** - The carefully engineered substrate does not transfer heat during use.
- **FAST!** - eZr's coarse grit blue grinders make your adjustments fast and convenient.

eZr Intra-oral **Polishing:**

- **Unparalleled smooth polish** - Don't take our word for it! - "The eZr system is the only one I've tried that polishes zirconia to smooth!" Todd Brower, DDS, Holland, Michigan.
- **Increased physical stability** - Highly polished zirconia and lithium disilicate is stable and non-abrasive to opposing dentition.
- **No paste required** - Forget the mess and expense of polishing pastes. eZr is all you need.
