How to Measure for Custom Roman Shades

Supplies You'll Need:

Tape Measure

Pen or Pencil

Sketch Pad

INSIDE MOUNT ROMAN

Step 1. Find the width of your window. Use the tape measure to measure from the left of the window to the right of the window. Make sure to be very precise, down to the eighth of an inch! Note: this measurement is for an INSIDE MOUNT roman so measure from the inside of the trim around your window, not the outside!

Write down this width measurement on your sketch pad.

Step 2. Find the length of your window. Use the tape measure to measure from the bottom to the top of your window (inside of the trim). Again, be very precise with this measurement, down to the eighth of an inch!

Write down this length measurement on your sketch pad.

When entering these measurements on the site, remember width is first, then length!

OUTSIDE MOUNT ROMAN

Step 1. Measure the width of your window.

If you do not have trim around your window, simply just take the width of the window alone, and add 1.5 inches to each side, adding 3 inches in total.

If you do have trim around your window, measure from the outside edges of your trim, going from left to right. On top of this measurement, you will be adding 1.5 inches to the left and the right, adding 3 inches in total of what you just measured.

Write down the width measurement for your outside mount roman, including the 3 inches we added, on your sketch pad.

Step 2. Measure the length for your outside mount roman. Use the measuring tape to go about 8 or 9 inches about the opening of your window, regardless if you have trim or not. From that point, measure all the way down where you want your roman to stop. If you do have trim around your window, we recommend to take this measurement down about 1.5 inches past the trim. If you do not have trim, take this measurement 1.5 inches down from the opening of your window.

This will be your length measurement for your outside mount roman, so write it down on your sketch pad.

Next, enter those measurements into our site and have fun picking from our amazing fabrics!
