

Lava ME Air Carbon

*The Lava ME Air might just be the ultimate guitar for musicians on the go. Compact, comfy to play, and built for travel, it's made from super durable carbon fibre, so it can handle pretty much anything—hot sun, freezing cold, high humidity, you name it. And with built-in reverb, delay, and chorus effects that don't need any extra gear, what more could you ask for? **Nick Jennison** takes a closer look.*

AT just 36 inches long, the Lava ME Air is small enough to take anywhere. But don't be fooled by its size—it's got a 24-inch scale length, so it plays just like a full-sized guitar. Plus, thanks to its carbon fibre construction, it's crazy lightweight but also tough as nails. Temperature changes? Humidity? Forget about it. Whether you're jamming on a sunny beach or in a freezing cabin, this guitar stays perfectly in tune and ready to play.

One of the coolest things about the Lava ME Air is its built-in effects. Reverb, delay, and even distortion are right there inside the guitar. No pedals or amps needed—it's all handled by this clever internal actuator that projects the effects through the soundboard. It's like the guitar is alive and singing back at you.

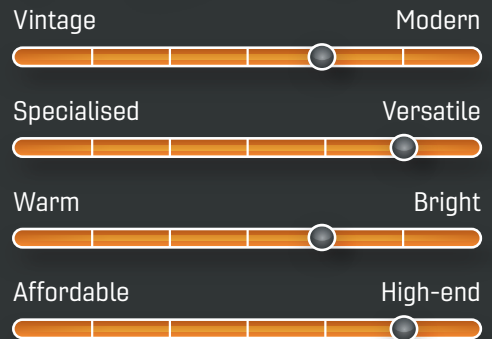

Controlling the effects is a breeze. There are three little knobs on the body for adjusting ▶

Lava ME Air Carbon

The Breakdown

For fans of

- » Having a guitar with you... everywhere!
- » Modern design
- » Affordability

The Lava ME Air isn't trying to replace your trusty old acoustic—it's in a league of its own.

your settings, or you can go all-in with the Lava Plus app. Just connect via Bluetooth, and you can customise effects, create effect chains, or tweak settings until you find the perfect sound.

Playing the Lava ME Air feels as smooth as it looks. Its tone is modern and bright, cutting through any mix effortlessly, and the low action makes it ridiculously easy to play. Whether you're fingerpicking intricate melodies or strumming big, open chords, it's super responsive right out of the box.

Plug it in, and the DI output gives you a clean, pro-level sound that's perfect for gigs or recording. But honestly, even unplugged, the onboard effects sound so good you might forget about needing an amp. Hearing reverb and delay coming straight from the guitar itself? Pure magic.

The Lava ME Air is built to keep up with you. Its re-

chargeable USB battery powers everything seamlessly, and regular software updates mean you'll always have access to the latest features and effects. This guitar grows with you—and how many instruments can say that?

If you're into sharing your music, the Lava Plus app has a built-in social platform where you can connect with other musicians, post your creations, and get inspired by what others are making. It's a fun little bonus for anyone who loves being part of a creative community.

The Lava ME Air isn't trying to replace your trusty old acoustic—it's in a league of its own. Compact, tough, and packed with fun features, it's perfect for players who want to jam wherever inspiration strikes. A total game-changer for anyone who loves to play on the move.
