

TechniFoamer 40L Air Driven Foaming Machine

TECHNIFOAMER | 40

Extreme strength & durability

High chemical resistance

Safe & Portable non-pressurised tanks

KEY FEATURES

- Tough, non-pressurised tank - stable design
- Compact and manoeuvrable, for hard to reach areas
- Portable and lightweight, with carry handles
- Available in blue or red for colour coding
- Up to 10m of flexible foam hose
- Improved drain valve
- Available for use with chlorinated chemicals

The Technifoamer40 is a compressed air driven foaming machine for the application of cleaning chemicals in the food, pharmaceutical and agricultural industries.

Pre-diluted chemicals are pumped from the main tank by an air diaphragm pump, and delivered through the application hose. With the addition of compressed air via a control valve the foam quality is fully adjustable to suit the chemical and the application.

TECHNICAL DETAILS

- Weight: 21kg - 10m version (empty)
- Compressed Air: 4-6 bar
- Tank capacity: 40L
- Material: Stainless Steel/PE

Position

Blue Red

Standard Pump 10m Hose	9232	9230
Chlorine Proof Pump 10m Hose	9233	9231
