GODIN RADIUM CARBON BLACK RN

CANADIAN EXPERTISE!

GODIN HAS ALWAYS BEEN A BRAND APART... SINCE 1975, ROBERT GODIN HAS STRIVED TO OFFER US INSTRUMENTS OF GREAT QUALITY AND HAS ALWAYS SEEN TO STAND OUT FROM OTHER BIG NAMES IN GUITAR WITH OFTEN VERY SUCCESSFUL AESTHETIC CHOICES! TRUE TO ITS COMMITMENTS, THE ENTIRE GODIN RANGE CONTINUES TO BE MANUFACTURED IN CANADA!

Godin's standard electric line, known for its quality guitars, offers a revisited version of its Radium guitar. Godin, a renowned Canadian manufacturer, offers a wide range of guitars, from affordable acoustic models to high-end electric instruments. The Radium, launched in early 2020 and available in several colors, embodies the brand's characteristic practicality and robustness.

The Radium combines elements of Godin's Radiator and Stadium models. It features a short-scale mahogany neck glued to a solid basswood body, offering a simple and effective design. Available in three understated finishes, its body features an ergonomic cutaway for optimal comfort. The guitar is equipped with three direct-mounted HSH pickups, with a Telecaster-style single-coil middle pickup and two humbuckers, as well as a wraparound bridge. The controls, including a five-way pickup selector switch and volume and tone knobs, are mounted on a lightly aged Telecaster-style plate.

The Radium offers a familiar, Telecaster-like playing feel, weighing just 7 lbs (3.24 kg) and boasting a comfortable satin-finished neck. The medium frets and rosewood fingerboard add to its classic appearance.

WHAT IS IN ITS GUTS?

The Radium's acoustic response is smooth and deep, giving the impression of a well-broken-in guitar. Tonally, it offers plenty of power and thickness at the bridge, and a more vintage sound at the neck.

The five-way pickup switch allows for a wide variety of tones, ranging from Stratocaster tones to the brighter sounds of humbuckers. The Radium stands out for its unique blend of styles, with a Gibson-style set-in neck and wraparound bridge, delivering intense and versatile tones! Ready to play right out of the box, it's extremely playable and

perfectly tuned. While it's not the most fashionable model, its price is reasonable for a guitar made in North America. In short, the Radium is like a robust and versatile "workhorse," ideal for guitarists looking for an alternative to traditional models, with remarkable build quality. It's ready for the stage!

TECH

BODY: Basswood

NECK: Maple

FINGERBOARD: Rosewood

NUT: GraphTech

TUNERS: Oil-Bath

ELECTRONICS: HSH

CONTROLS: 1-way switch,
5 positions + volume and tone knobs
