

**Cosmo is the new professional table, perfect for carrying out all manner of nail treatments.**

It is the ideal solution for furnishing a workspace dedicated to the care and beauty of clients' hands.

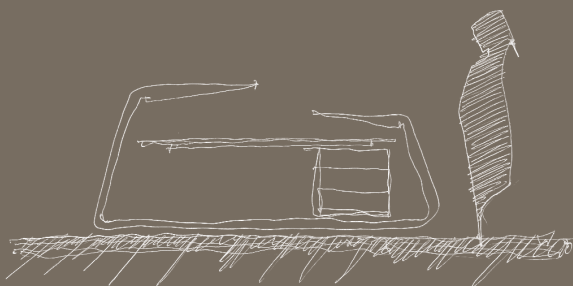

Imagined by a team of designers specializing in the sector COSMO is the result of extensive research to produce a modern product reflecting the needs of the care and beauty world.

A piece of furniture which boasts elegant lines, COSMO is made from innovative materials, with close attention paid to the finer details and finish of the table.

The table's design is not just about aesthetics; it represents a perfect balance between style and functionality. This table is crafted with special attention to the health of nail technicians, who face daily exposure to harmful dust and fumes. Thanks to innovative solutions, it provides a safer and healthier workspace, proving that true design prioritizes not only appearance but also the well-being and safety of its users.

**COSMO is the only complete table** which includes a natural tone LED light, two plug sockets with extra USB and USB-C ports, a convenient push-and-pull drawer and shelves designed to fit even taller products.

The table measures 150 cm in length, 52 cm in depth and 75 cm in height, providing a comfortable and optimized space for both the technician and client.

## THE NEW MS TECHNOLOGY NAIL STATION

**A project aimed at enhancing the performance of nail technicians by guaranteeing them a working environment which is clean comfortable, safe and healthy.**

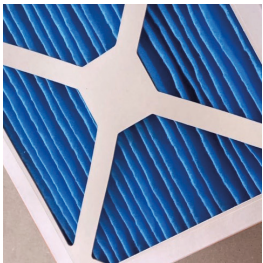

The Cosmo table makes use of GVS' TECHNOLOGY, a leader in the field of filtration. The table has 2 areas of suction, each supported by replaceable particulate filters certified and tested to 100%.

The filters are capable of intercepting and trapping VOC (Volatile Organic Compounds generated by varnishes, lacquers solvents and glues) as well as the powders created by the shaping of nails, down to a size of 3um, all substances recognized as being extremely damaging to the health.

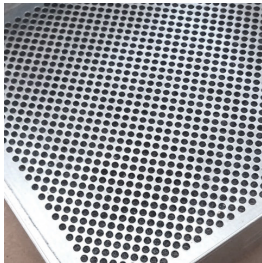

**The particulate filters purify the air of all noxious substances to prevent the risk of discomfort and illness for both client and technician during nail treatments.**

Such risks necessitate the choice of furniture, tools and equipment which conforms to the Testo unico sulla salute e sicurezza sul lavoro D. Lgs. 81/2008, ex D. Lgs. 626/1994

**Moreover, these filters are designed to comply with UK HSE SR13 (SR - COSHH Essentials for Service and Retail).**

Pre-filter removes dust & fine particles

Activated carbon filter absorbs solvents & fumes
