

Reinvent your cleaning process with

HyDrive

HyDrive

Power-assisted cleaning designed for demanding food production environments.

HyDrive transforms traditional manual cleaning into a faster, more efficient process - helping you save time, reduce strain, and maintain consistent hygiene standards.

Manual cleaning is holding you back

In many food production environments, cleaning still relies on manual scrubbing.

This often leads to:

- Time-consuming cleaning processes
- Inconsistent results between operators
- High physical strain and repetitive motion
- Inefficient removal of stubborn residues

→ A smarter way to clean

HyDrive introduces power-assisted cleaning to your routine.

By connecting directly to cordless drills or pneumatic tools, it enables operators to clean faster, with less effort, and with more consistent results.

Stubborn residues such as dough, chocolate, labels, and baked-on buildup can be removed quickly and effectively, without relying on intensive manual scrubbing.

HyDrive™ is built to handle the toughest cleaning tasks in food production environments

Designed to perform

HyDrive is built to handle the toughest cleaning tasks in food production environments

- Very stiff bristles deliver aggressive cleaning performance
- Efficient removal of sticky and baked-on residues
- Suitable for both wet and dry cleaning conditions
- Broad coverage for faster cleaning of larger surfaces

Efficiency without compromise

- Reduce deep-cleaning time and improve productivity
- Minimise repetitive motion and operator fatigue
- Improve consistency across cleaning teams
- Support faster and more efficient changeovers

Engineered for food safety

HyDrive is designed to meet the highest hygiene standards:

- Manufactured from FDA and EU compliant materials
- Suitable for food-contact surfaces
- Available in six colour options for hygienic zoning
- Durable construction for repeated use in demanding environments

HyDrive

Performance. Hygiene. Efficiency.

Part of a flexible cleaning system.

HyDrive is more than a brush - it's a system.

With the **HyDrive** adaptor, you can connect Vikan threaded brushes to power tools, extending the benefits of power-assisted cleaning to additional applications such as pipes and hard-to-reach areas.

This flexibility allows you to optimise your cleaning processes across multiple tasks and environments.

Suitable for food-contact environments

Made from FDA / EU compliant materials

Supports hygienic zoning with 6 colour options

Durable construction for repeated deep-clean cycles

Upgrade Your Cleaning Performance With HyDrive™

Use the HyDrive adaptor to power your existing Vikan threaded brushes and extend the benefits of power-assisted cleaning across more applications.
