

KUMU Dining Table

Congrats on your new KUMU Table!

We hope you will enjoy your new table for many years to come. On the following pages, you will find guidance on how to assemble and care for your new piece of furniture.

Taking care of your KUMU Table:

Wood

The wooden parts are made from solid oak and finished with oil.

The oiled surface helps protect the wood while allowing the natural grain and character of the oak to remain visible. To clean the table, use a damp cloth and, if needed, a mild detergent.

Do not leave the table wet or soaked for longer periods of time, and always dry it off after cleaning.

As the table is made from solid wood, small changes in colour, grain and surface character are natural and part of the material's beauty. Over time, the oak will develop a richer patina through use and exposure to light.

Metal

The metal parts are made from untreated stainless steel.

Stainless steel is a durable material that will naturally show small marks and signs of use over time. Clean with a damp cloth and mild detergent if needed, then dry off with a soft cloth.

Avoid using abrasive cleaners or rough sponges, as these may scratch the surface.

5 Year Warranty

We believe in what we do and in the quality of our products. That's why we give you a 5 year warranty. This guarantee covers any functional, material or manufacturing defect on any product you buy from us for private use.

Safety and durability

The durability and safety of our tables have been tested by the Danish Technological Institute according to the European standard for dining tables EN 15372:2016, and has passed this test.

Spare parts – Keep it going forever

All our products are component based and have been designed this way to make repairs simple. You can find and purchase all spare parts for your product on www.moebe.dk for a period of at least 5 years after your purchase. It should always be cheaper and easier to repair, than buying new.

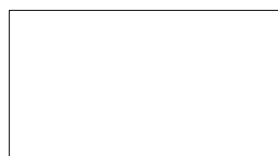

Recycling

Whilst we hope that your KUMU Dining Table will serve you well for many years to come, if you do at some point wish to recycle it then it is easy to do so. Simply split the product down into its separate parts and recycle them by material.

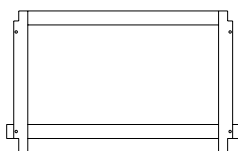

All parts can be recycled. How this is done depends on local regulations and facilities.
