

Loer Floor Light Installation Instructions

The Loer Floor Light has been designed to work with an E27 **LED** candle shape light bulb, up to a maximum of **25 Watts**.

1. Carefully place the glass sphere (B) over the light bulb and locate onto the brass thread of the bulb holder. Gently tighten the sphere onto the bulb holder securely connecting the two parts. Due to the fragility of the glass sphere diffuser, this step should be carried out with great care to avoid breakage.
2. Plug in the Loer Floor Light to the nearest outlet, and turn the power supply on to complete installation.

**** If the external flexible cable or cord of this luminaire is damaged, it shall be exclusively replaced by the manufacturer or his service agent or a similar qualified person in order to avoid a hazard. For indoor use only. ****
