

## How to active the NDI and how to use it

### Introduction:

GoStream support NDI inputs. The NDI of **Duet** series is given for free and has already been activated. The **Deck** series need to purchase a NDI license and manually activated.

Note: Only support the NDI HX. If you can see the NDI source in the NDI list but can't see the video in Gostream. Please check the prompts on the Multiview and check the NDI source format.

**Step 1:** Put license key file (.ndi) into the root directly of an SD Card ( need to be exFAT format), then inset it into GoStream.

**Step 2:** Connect your GoStream and NDI source into a same network.

**Step 3:** Set the Gostream video channel to NDI.

**Step 4:** Open the NDI list, choose your NDI sourc. For GoStream Deck, long press the PLAY button to pull out NDI Source list.
