

Environmental Product Sheet

The Spanish Chair, 2226

Design story of the product

The iconic Spanish Chair is Børge Mogensen's masterful contribution to modern design, designed for Fredericia in 1958. Solid oak or walnut combined with the highest calibre saddle leather creates a strong presence in a chair that will only become more beautiful with age.

Company description

Since 1911 the core of Fredericia's company ethics has been to encourage customers to buy fewer but better products. With the ultimate goal of creating furniture's that become more beautiful with age and can be passed from generation to generation. These core values are rooted in our sense of responsibility, seen in our use of natural materials, our ethical methods of production and our respect for the people using our furniture every day.

Supplier support

Through our ongoing implementation of Sustainable supplier selection and Code of Conduct, we ensure that our suppliers meet our conditions regard to human rights and environmental standards among other things.

Design for environment criteria

In the phase of developing new products or re-engineering existing products Fredericia Furniture follows the below listed principles:

- Timeless design
- Long material lifetime
- Crafted to last
- Easing disassembly of products to increase circularity and ease repair of broken parts
- Increase the use of recycled materials

Material declaration

Lounge chair of solid wood and saddle leather. Interchangeable seat and back made in vegetable tanned saddle leather with metal buckles. Leather seat has canvas backing. Saddle straps can be tightened as the leather expands through use.

Environmental data

The whole product incl. packaging material

Recycled content: 23%

Virgin content: 77%

Life cycle assessment data

The Climate footprint = **300 kg of CO₂e** in a level 2 screening validated by the Danish Company, Målbar. This result is based upon the lowest emitting variant of the model and is Målbar's estimate on the outcome within the boundaries of 230 – 350 kg of CO₂e.

The CO₂e accounts for carbon dioxide and other gases e.g., methane and nitrous oxide. The screening complies with the European LCA-rules PEF (Product Environmental Footprint) meaning that it covers the whole product life cycle incl. extrusion of raw materials to end-of-life handling.

Test

EN 1021-1:2006

Smouldering cigarette, EN 1021-2:2006

Match flame equivalent, EN ISO 6941:2003

Warranty

Fredericia Furniture A/S offers a 25-year guarantee against manufacturing defects in standard products (materials and construction). The warranty does not cover wear and damage to covers, surface treatment, inappropriate use and the like.

Disclaimer

The Climate footprint assessment is based upon delivery to an average EU customer and a 15-year lifetime. Be aware of the variety of assumptions when comparing different life cycle assessments from different companies as the level of detail can vary.

This document is not third-party validated, and the communication is only intended for B2B customers.

Content Declaration

The charts below describe the materials used in the product.

MATERIAL	MASS [KG]	SHARE	CONTENT
Solid oak	8	66%	Virgin
Saddle leather	3,4	28%	Virgin
Steel	0,3	3%	Virgin
Linen	0,1	1%	Virgin
Glue	0,1	1%	Virgin
Soap	0,1	1%	Virgin
Stainless steel	0,1	1%	Virgin
Total	12,1		

PACKAGING MATERIAL	MASS [KG]	SHARE	CONTENT
Cardboard	4,3	99%	Recycled
Polyethylene (PE)	0,04	1%	Virgin
Total	4,34		

Detailed Climate Footprint Assessment - CO₂e

The Climate footprint assessment is verified by Målbar February 2nd, 2023.

- 
Disposal: At Fredericia Furniture, we recommend our customers to handle our products with care when the product have served its use. We emphasis therefore that spare parts are reused/recycled when possible and/or products repaired with thought of the future. Sort the spare parts according to your country's regulations.
- 
Use phase: This is the longest phase of the life cycle. During the use phase of our products, a limited environmental impact occurs.
- 
Transport: Includes all transport between suppliers and from manufacturing gate to end consumer.
- 
Packaging: Includes all packaging material.
- 
Production: This phase includes both the manufacturing of components but also the assembly of finished goods.
- 
Production waste: Includes the waste that is generated during the different production processes that is needed to manufacture the product.
- 
Cover: Expresses the environmental impact that the cover has if the product consist of it.
- 
Upholstery: Expresses the environmental impact that the upholstery material has if the product consist of it.
- 
Surface treatment: Showcases the total environmental impact that the product has concerning surface treatments.
- 
Materials: Includes the extraction of materials, and the benefit of recycled content is considered.
