

# KÄRCHER

makes a difference

## PROFESSIONAL CLEANING SOLUTIONS FOR COMMERCIAL VEHICLES

# The right product to keep every part of your business immaculate.

At Kärcher, we understand the unique demands placed on truck workshops to stay clean, safe and well presented at all times. This catalogue details typical products to keep all areas of a truck workshop in the best condition with minimal cost and effort. We encourage you to get in touch with us so we can help to specify the right products for your business.

		Yard	Workshop	Offices	Vehicles
<b>High pressure cleaners</b>					
<b>Cold water medium class</b>	Tough 4-pole motors designed for long periods of use. 240V or 3-phase power. High water flow rinses dirt away quickly. Use with a hard surface attachment to clean wash bays and yards.	■	■		■
<b>Hot water medium class</b>	High mobility enables easy movement and storage. Outstanding cleaning performance and reliability to ensure high productivity. Tough 4-pole motors designed for long periods of use. 240V or 3-phase power.	■	■		■
<b>Hot water cabinets</b>	Stationary cabinet machines that offer high security and simple controls. Tough 4-pole motors designed for long periods of use. 240V or 3-phase power.				■
<b>Scrubber driers</b>					
<b>Compact, mains powered</b>	Our BR 30/4 C is as easy to use as a vacuum cleaner but scrubs and dries floors in a single pass. A great tool for any part of the building. Our heavy duty BR 40/10 C is ideal for daily deep cleans of any area from service bays to larger receptions.		■	■	
<b>Compact, battery powered</b>	No trailing cable and anytime-charge batteries make these machines perfect for daytime cleaning. Innovative steering wheel and paddle controls make cleaning simple and safe, even around obstacles..		■	■	
<b>Walk-behind, battery powered</b>	Innovative features including traction drive, high speed roller brushes, tank rinsing, auto-fill and Kärcher intelligent key make these machines very easy, safe and productive to operate.		■		
<b>Ride-on, battery powered</b>	The most productive way to clean larger workshops on a daily basis. A host of features are included as standard to make life easier and cleaning quicker and less obtrusive.		■		
<b>Vacuums cleaners</b>					
<b>Dry tub vacuums cleaners</b>	A-rated, low noise tub vacs for carpets, hard floors and vehicles.			■	■
<b>Upright vacuums cleaners</b>	The best choice for carpeted areas, our upright vacs clean deep into carpet pile and save time compared to tub vacs.			■	
<b>Backpack vacuums cleaners</b>	Innovative dry vacuum cleaners with mains or battery power. Perfect for keeping all areas of a showroom dust-free, including inaccessible areas.			■	
<b>Wet &amp; dry vacuums cleaners</b>	The best choice for workshops and valeting. High capacity containers, self-cleaning filters, and twin motors ensure high productivity and outstanding performance.		■	■	■
<b>Carpet &amp; upholstery cleaners</b>					
<b>Compact</b>	The easiest way to deep clean carpets, restoring original finish and removing stains and odours. Compact machines are perfect for spot cleaning office/customer areas and for deep cleaning of vehicle interiors.			■	■
<b>High capacity</b>	Large spray extraction machine provides longer working times between refills, and outstanding cleaning performance. Ideal for keeping office carpets and floor matting in perfect condition.			■	■
<b>Steam cleaners</b>					
<b>Compact</b>	Our compact steamer cleans hygienically without the need for chemicals. Ideal for laminates, tiles, glass and WCs. Can also be used for detailing of vehicles and stain removal from upholstery.			■	■
<b>Sweepers</b>					
<b>Push along</b>	An essential piece of kit for every dealership. Quickly sweep away dirt from forecourts before it enters the building. Also ideal for pre-sweeping indoor areas before scrubbing.	■	■		
<b>Walk-behind, petrol or battery powered</b>	Our powered sweepers with traction drive offer high productivity and exceptional dust control. Able to collect larger pieces of litter without stopping. Choose petrol for outdoor use only or battery power for indoor and outdoor use. Walk-behind versions offer easy storage and simple maintenance. For larger sites, ride-on models offer higher productivity.	■	■		
<b>Ride-on, petrol or battery powered</b>		■			
<b>Automatic vehicle wash</b>					
<b>Rollover gantry wash</b>	The best choice for sites washing many trucks each day. Rollover washes offer known whole-life costs, excellent reliability and outstanding washing and drying quality.				■
<b>Water reclaim</b>	Reduce water bills by up to 85% with our bespoke recycling systems.				■
<b>Detergents</b>					
	A vast range of highly concentrated, optimised detergents for all vehicle, floor and building cleaning. Get the best out of your cleaning machines and the best possible standards of presentation.	■	■	■	■

# The perfect partner to help you keep your business running smoothly.

As the world leader in cleaning machine manufacture, Kärcher understands the needs of its customers and develops innovative products that solve cleaning problems, often also reducing time and cost. Our products cover every part of a vehicle dealership.

## Resource and cost saving

All of our products are designed to use as little water or energy as possible. Most of our products feature ecoefficiency mode, designed to provide superb daily cleaning results whilst reducing energy and water consumption by up to 40%. Our DOSE detergent system eliminates detergent and water wastage. All of our steam cleaners and battery-powered scrubber driers qualify for Enhanced Capital Allowance, providing businesses with 100% first year tax relief on purchases of these machines.

## Detergents

Our highly concentrated detergents are designed and manufactured in-house, and are the best choice for use with our machines. From traffic film remover to fine stone cleaner, we have the hygiene and presentation needs of your dealership covered. Many of our pressure washers and scrubber driers feature the DOSE detergent metering system, eliminating detergent waste.

## Finance packages

We appreciate that every automotive business is different and that there are many factors that determine how purchases are made. Therefore we offer a range of finance packages, from outright purchase to lease hire, with and without service contracts. This way, you can be sure that the cleaning of vehicles and premises is a known cost.

## Training

Whether on-site or at our Academy in Banbury, we work with in-house and contract cleaners to ensure they get the most out of their cleaning machines, taking the operating environment into account.

## Roller technology

Most of our scrubber driers are available with roller brushes, which rotate at high speed to ensure floors are left spotlessly clean. We have a range of textures to best suit your floor, and all brushes can be quick-changed without tools to enable one machine to be used in different areas or on different floor types.

## KIK operation system

Innovations like our Kärcher Intelligent Key system set our products apart. Many of our scrubber driers and sweepers come with the technology, which enables a supervisor to set usage parameters for each operator. Speed, detergent usage and language can be pre-programmed to ensure that cleaning machines on your site are used in the safest and most cost-effective way.

## Service

Our service network is unrivalled. With over 40 service technicians around the country, downtime is minimal and first time fix rates are high. Our installation team works with customers to ensure ground works and wash bay installations run smoothly and on time.

## Hire

From deep cleaning of office carpets to seasonal yard sweeping, our hire partner can provide you with the right cleaning machines on a spot-hire or short-term basis – helping you to keep your business well-presented without investment in occasional-use products.

## VEHICLE EXTERIOR CLEANING

### Mobile hot water pressure washers

- Ideal for smaller workshops or where a mobile machine is preferred
- Range of optional accessories to make truck and yard cleaning quick and easy
- Steam function for degreasing tasks

- ecoefficiency mode reduces diesel consumption
- 3-year burner coil warranty\*
- Simple, accurate detergent dosing with on-board tanks

#### Recommended models

##### HDS 7/10-4 M

Single-phase 240V with 350-700l/h water flow and 30-120 bar pressure, adjustable at the gun. Easy-press trigger gun, 10m high pressure hose, power nozzle, 1050mm lance. 3.1kW air-cooled motor.

##### HDS 10/20-4 M

Three-phase 420V with 500-1000l/h water flow and 30-180 bar pressure, adjustable at the gun. Easy-press trigger gun, 10m high pressure hose, power nozzle, 1050mm lance. 7.8kW water-cooled motor.

### Stationary hot water pressure washers

- Ideal for larger workshops washing higher volumes of vehicles
- Secure, weather-proof housing with frost-protection
- Simple programme selection with optional token operation

- Detergent container stored inside cabinet. Can be connected to external tank
- Choice of stainless steel or painted steel cabinets
- 25 litre diesel tank. Can be connected to external tank

#### Recommended models

##### HDS-C 9/15

Three-phase 420V with 900l/h water flow and 150 bar pressure. Easy-press trigger gun, 10m high pressure hose, power nozzle, 1050mm lance. 5.3kW water-cooled motor.

#### Optional accessories

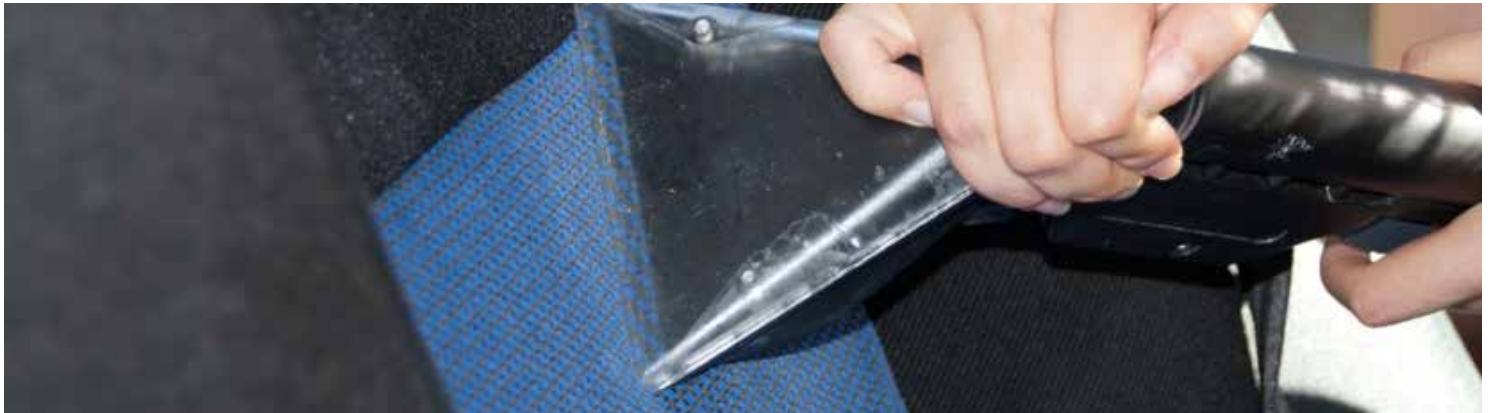

Our hot water pressure washers can be enhanced with a range of time-saving accessories including water-driven rotating brushes, extended lances and remote controls.

Tailored service contracts available on all Kärcher professional machines.

# VEHICLE INTERIOR CLEANING

## Spray-extraction cleaner

- Quickly deep-cleans carpets and upholstery
- Leaves surfaces virtually dry
- Compact and easy to transport

- Quick-release hose and attachments
- Upholstery tool for seats/curtains
- Easy-to-use detergent tablets

### Puzzi 8/1 C

Single-phase 240V with 1 bar spray pressure and high air-flow rate for fast drying. 2.5m spray/vacuum hose, 8 litre solution tank and 7 litre dirty tank. 1.2kW motor. Weight 9.8kg.

## Wet & dry vacuum cleaner

- For fast interior cleaning
- Collects wet or dry dirt
- Twin motors for very high suction power

- 65 litre container capacity
- Semi-automatic filter clean saves time, reduces consumable costs and ensures constantly high performance

### NT 65/2 Ap

Single-phase 240V with 10m mains cable. 4m vacuum hose, suction tubes, floor tool and upholstery tool. 65 litre container with drain hose. 2 x 1.4kW motors.

### Optional accessories

Floor tools, upholstery tools and detergents in tablet form make cleaning quicker and easier.

### Optional accessories

A range of accessories are available including damp-resistant filters, extension hoses and upholstery tools.

## WORKSHOP CLEANING: SCRUBBER DRIERS

### BR 40/10 C Adv

- Compact heavy-duty floor scrubbing and drying machine
- Adjustable contact pressure
- Easy to transport and maintain

- Ideal for cleaning single bays, pits, platforms and around work benches.
- Ideal for removing surface water/spillages

#### Specification

Single-phase 240V with twin, high-speed roller brushes and twin suction bars. 400mm working width, 10 litre clean/dirty tanks. 2.7kW motor.

#### Optional accessories

Our range of different brush types ensures we can specify the right type for your floors, reducing cleaning time and consumable costs.

### BR 40/25 C Bp

- Compact floor scrubber drier
- Higher capacity than 40/10
- Simple controls

- Ideal for cleaning single bays and smaller workshops on a regular basis
- Ideal for removing surface water/spillages

#### Specification

24V maintenance-free battery power, with twin, high-speed roller brushes and single suction bar. 400mm working width, 25 litre clean/dirty tanks. Approx 2-hour battery life. On-board charger.

#### Optional accessories

Our range of highly concentrated detergents are designed for use with our machines and can save considerable amounts of time and money. We will specify the right products for your requirements.

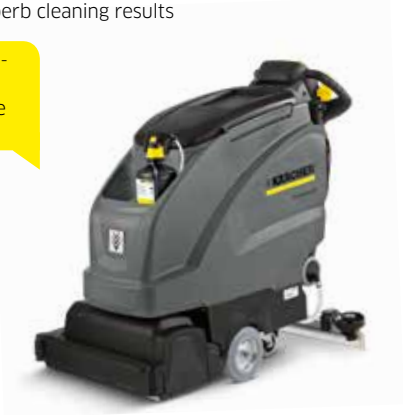

Tailored service contracts available on all Kärcher professional machines.

Roller brushes are the best solution for workshop floors.

### B 40 W DOSE

- State-of-the-art scrubber drier with 45cm or 55cm cleaning width
- Several time- and cost-saving features
- High productivity and superb cleaning results

- Ideal for cleaning medium-large workshops
- Ideal for removing surface water/spillages

#### Specification

24V maintenance-free battery power, with twin, high-speed roller brushes and single suction bar. 450 or 550mm working width, 40 litre clean/dirty tanks. Approx 2.5-hour battery life. On-board charger.

### B 60 W DOSE

- State-of-the-art scrubber drier with 55cm or 65cm cleaning width
- As the B 40 but with larger water tank and adjustable contact pressure for uneven or heavily soiled floors

- Ideal for cleaning larger workshops
- Ideal for removing surface water/spillages

#### Specification

24V maintenance-free battery power, with twin, high-speed roller brushes and single suction bar. 550 or 650mm working width, 60 litre clean/dirty tanks. Approx 2.5-hour battery life. On-board charger.

Need something bigger? We also have larger walk-behind and ride-on scrubber driers in our range. We can help you to specify the right equipment for your site.

## WORKSHOP CLEANING: VACUUMS AND SURFACE CLEANERS

### Wet & dry vacuum cleaner

- For floor drying and spillage removal
- Collect wet or dry dirt
- Single, twin or triple motors for very high suction power

Higher suction performance and more versatility than standard dry vacuums

#### Recommended models

##### NT 65/2 Ap

Single-phase 240V with 10m mains cable. 4m vacuum hose, suction tubes, floor tool and upholstery tool. 65 litre container with drain hose. 2 x 1.4kW motors.

##### NT 48/1

Single-phase 240V with 10m mains cable. 4m vacuum hose, suction tubes, floor tool and upholstery tool. 48 litre container with drain hose. 1.4kW motor.

#### Optional accessories

A range of accessories are available including damp-resistant filters, extension hoses and upholstery tools.

### Hard surface cleaner with water extraction

- Attaches to pressure washer for fast cleaning of hard surfaces
- Unique Venturi system automatically extracts water away from cleaning area
- Metal body for use with hot water for faster, deeper cleaning

Ideal for deep-cleaning of floors, walls, wash bays and pits

#### FRV 30 Me

Hard surface attachment for pressure washers with >600 litres/hour water flow. 300mm working width. 5m extraction hose.

# WORKSHOP AND OUTDOOR SWEEPERS

## KM 70/20 C

- Simple push-along sweeper
- Large roller brush and belt-driven side brush for edge cleaning
- Faster, easier and more thorough than using a broom

- Makes light work of collecting workshop debris, leaves, dust and dirt
- Ideal for indoor and outdoor use

### Specification

Push sweeper with two driven brushes and adjustable brush contact pressure. 700mm working width, 21 litre capacity.

## KM 75/40 W Bp

- Battery-powered vacuum sweeper with traction drive
- Large roller brush and belt-driven side brush for edge cleaning
- Higher productivity and dust-control capabilities than KM 70/20

- Makes light work of collecting workshop debris, leaves, dust and dirt
- Ideal for indoor and outdoor use and for yard cleaning

### Specification

Traction-drive vacuum sweeper with two driven brushes, adjustable brush contact pressure and manual filter cleaning device. 750mm working width, 40 litre capacity. Approx 2.5-hour battery life. On-board charger.

Ride-on sweepers are available for short-term hire - ideal for periodic yard cleaning. Ask for details.

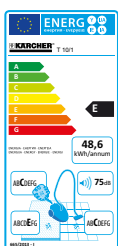

Tailored service contracts available on all Kärcher professional machines.

## RECEPTION, OFFICE AND CUSTOMER AREA CLEANING

### T 10/1 Adv

- Simple dry tub vacuum
  - 10 litre container
  - Hard floor/carpet tool
- Can be used on hard floors or carpets, but is best-suited to hard floors

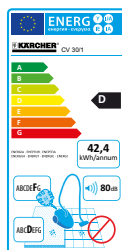

#### Specification

Single-phase 240V with 10m mains cable. 2.5m vacuum hose, suction tubes, floor tool and upholstery tool. 10 litre container. 1.1kW motor.

### CV 30/1

- Upright dry vacuum with roller brush
  - 5.5 litre container and 300mm working width
  - Roller brush cleans carpet deeply and lifts pile
- Can be used on hard floors or carpets, but is best-suited to carpets

#### Specification

Single-phase 240V with 12m mains cable. Vacuum hose with crevice tool and upholstery tool. 5.5 litre container. 1.0kW motor.

### Puzzi 10/1

- Compact carpet & upholstery cleaner
  - 10 litre container
  - Includes floor tool and upholstery
- Featuring quick-change floor tool and upholstery tool. Fast, deep-cleaning of any textile surface, including office carpets, chairs and matting

#### Specification

Single-phase 240V with 1 bar spray pressure and high air-flow rate for fast drying. 2.5m spray/vacuum hose, 10 litre solution tank and 9 litre dirty tank. 1.2kW motor. Weight 10.7kg.

#### Optional accessories

Floor tools, upholstery tools and detergents in tablet form make cleaning quicker and easier.

## BR 30/4 C

- Compact scrubber drier cleans and dries hard floors in a single pass
- 300mm cleaning width
- Faster, easier, safer and more thorough than using a mop

- Ideal for daily cleaning of any hard floors in office, reception, waiting areas and hygiene areas
- Vacuum-off function for deeper cleaning

### Specification

Single-phase 240V with 10m mains cable. 2.5m vacuum hose, suction tubes, floor tool and upholstery tool. 10 litre container. 1.1kW motor.

## BR 35/12 C Bp

- Compact battery-powered scrubber drier cleans and dries hard floors in a single pass
- 350mm cleaning width with 12 litre tanks
- Steering wheel control enables cleaning right into corners

- For daily cleaning of any hard floors in larger office, reception, waiting areas and hygiene areas
- Vacuum-off function for deeper cleaning

### Specification

25.2V, 21Ah Lithium-Ion battery with on-board charger. Single high-speed roller brush and single suction bar on pivoting cleaning head. 350mm working width, 12 litre clean/dirty tanks. 820W motor. Approx 1.5-hour battery life and three-hour charge time.

## SG 4/4

- Compact steam cleaner
- 4 litre tank that can be refilled any time
- Faster, easier and more thorough than using chemicals and manual cleaning

- Ideal for regular, hygienic deep cleaning and restoring of sanitary areas.
- Includes a range of accessories for cleaning of flat surfaces and detailed objects like taps

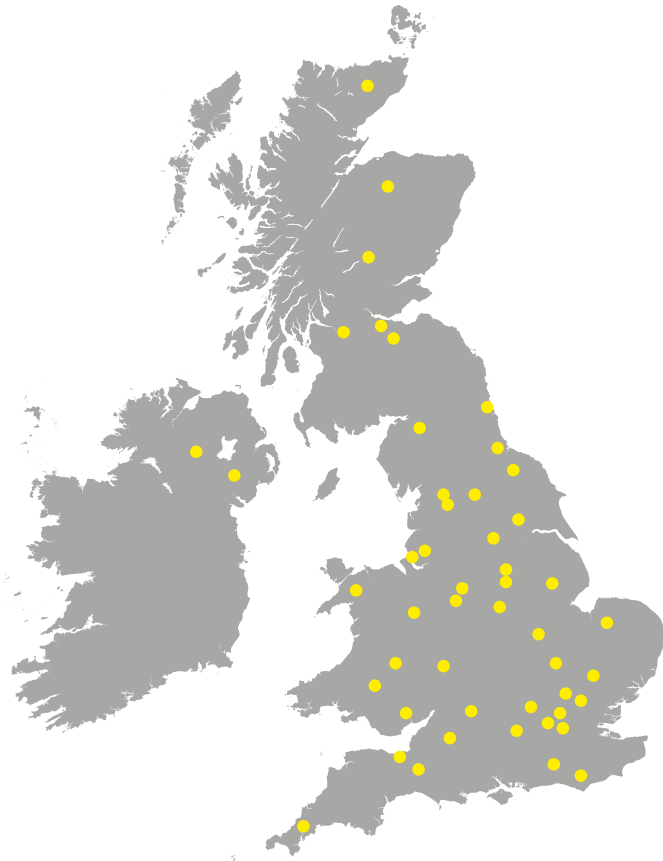

### Specification

240V single phase with 7.5m mains cable. 4 litre tank capacity with any-time refilling system. 2.3kW heating element. Includes steam hose, steam tubes, floor tools, detail nozzle, detail brushes, microfibre cloths and upholstery tool.

## LOCAL SUPPORT FROM THE GLOBAL MARKET LEADER

With over 30 Area Sales Managers and 40 Service Engineers, advice and support is always close by.
