

# KAMMOK

Adventure grade. Better made.

## WARNING

MAXIMUM WEIGHT - 300 LB

USE HAMMOCK WITH CAUTION. INHERENT RISKS EXIST.

Before every use, fully inspect the hammock and straps for snags, fraying, construction, and general wear and tear. If anything suspicious is found during the inspection, discontinue use immediately and contact the Kammok team with questions (contact info on the back of this label).

Always make sure to clear the area beneath your hammock. Inspect for objects above the hammock that pose a risk of falling (e.g. dead tree limbs). Under no circumstances should you hang your hammock more than 18 inches off of the ground. Do not stack hammocks. Always test the hammock to ensure it is hung correctly before putting your full weight into it. Activities other than reclining can result in injury. Do not permit children to use unattended. Do not jump or swing aggressively in the hammock. Always follow provided instructions. Do not modify your straps or hammock in any way; modification may result in failure or injury and will void your lifetime warranty.

### Pyton Straps Care

Keep out of direct UV light when not in use. Do not wrap around sharp surfaces. Wash gently with cold water. Air dry.

**Lifetime  
Warranty**

Find your serial number under this label.

# How to hang your hammock

- 1** Find two live trees at least one foot in diameter.
- 2** Wrap your Python Straps six feet above the ground.

- 3** Clip carabiners to straps to hang your Roo.
- 4** Kick back and relax.

*(Do not hang from cacti. Neither party will be safe.)*

## Equip and Inspire

Every purchase fuels our mission to equip and inspire for life changing adventure. We give 1% of annual revenue to increase outdoor access and mentorship opportunities for youth in Austin.
