zazen Water Mission

Helping you live a longer, healthier life.

We're professional women with backgrounds in commerce and natural health. We became aware of the alarming downward trend in child health and wellbeing.

With this Awareness - We felt a deep Responsibility to Act.

zazen Water was founded in 2008 focused on addressing the importance of child hydration and giving children free access and education in the classroom on the importance of water in their lives. They gain an understanding of the power of water and experience how water can improve the way they feel, behave and perform.

“Children today are at risk of being the first generation to have a shorter lifespan than their parents.”
New England Journal of Medicine 2005

“I had no idea that the water I was giving my children to drink may actually have been making them sicker. My daughter drank 4 glasses of zazen water and my son drank 1.5 glasses when we visited my local Naturopath, I just couldn't believe it as they never drank water. I always just thought water was water, now I know it is not. Thank you for doing what you are doing.”
Lisa Lawson - Teacher & Mother, Quirindi

An Australian Social Business Enterprise

Contribute to a Wellness Generation

By purchasing zazen Water products you will be supporting the zazen Water Ambassador School Program. This program gifts free zazen Alkaline Water Systems to primary schools across Australia to ensure kids stay hydrated, supporting their physical and mental wellbeing. Visit our web site to discover more about the Program, thank you.

Water is the most important substance we will ever put into our bodies - next to Oxygen

Adults are 75% water
Children even higher!

Children lose 8 cups of water per day, adults up to 12 cups

Our Blood is mostly water, this water supports our body functioning at an optimum, every moment of every day!

- Water carries toxins out of cells and transports nutrients in
- Water is found in every cell in our body; bones, eyes, lymph nodes, heart, lungs, liver, muscles, joints, your brain is 92% water

Not all Water is the Same

zazen Wheat Seed Growth Experiment

To hydrate we need the right water... but what is the right water?

By asking this question we go further than other water filter systems in the world today. By asking this question, we are focused on producing the right water for the body to hydrate. That is the philosophy behind the design of the **zazen Alkaline Water System**.

The right water is:

- ✓ Clean with toxins, contaminants & chemicals filtered out
- ✓ Balanced with a range of alkaline minerals to aid absorption by the body
- ✓ Structured with water clusters small enough for absorption at a cellular level

zazen Living Water Crystal

zazen Alkaline Water System Recreates Mother Nature's Water Secret

Our zazen Alkaline Water System replicates Mother Nature's natural water filtration and remineralisation process. It transforms your drinking water into refreshing, alkaline mineral water that tastes great and hydrates you at a cellular level. Just like natural spring water.

It has been designed by zazen, in collaboration with leading Japanese and Korean water scientists, who discovered that the health and longevity **secret** of the world's oldest and healthiest people lay in the quality of the water they drank and bathed in every day!

The zazen Water System is designed specifically for Australian and New Zealand water supplies.

The Benefits of drinking zazen Alkaline Water

- Supports a more alkaline less acidic body
- Helps to eliminate toxins & acidic waste
- Improves absorption & use of nutrients
- Increases cellular energy flow & vitality
- Helps to boost immune function
- Improves performance & focus
- Supports better quality sleep
- Reduces fatigue and headaches

FACT: A mere 2% drop in body water can trigger fuzzy, short term memory loss, constipation, aches & pains not related to injury, fatigue, yawning, moody behavior and cravings for sugar and caffeine.

"It's very important to have a water filter that not only removes the increasing harmful water contaminants such as carcinogenic compounds, but one that replaces the minerals that we do need. zazen Alkaline Water provides the mineralisation we need, and takes out the toxins we don't need that weren't in our water 50 years ago!"

Pauline Roberts PhD., BSc. (Hons), DBM, Naturopath & Scientific Researcher

Changing the Water you Drink is the simplest health decision you can make, today!

Quality Assured

zazen Water is tested independently by SAS Laboratories (a certified Australian Government Water Testing Laboratory).

Toxins & Chemical Micro-Filtration	zazen Water
Chlorine	>99.98%
Copper	>99.98%
Lead, Iron, Arsenic, Aluminium	>99.98%
Fluoride	up to 90%
THM'S Chloroforms	>95%

Alkaline Minerals in zazen Water		
✓ Magnesium	✓ Silica	✓ Chloride
✓ Potassium	✓ Calcium	✓ Sodium
