MAJKA

research supphany

We comissioned a quantitative/qualitative research study to gather in depth feedback on our Lactation Bites and Nourishing Lactation Protein Powder, we had over 100 participants from ages 18-44. The goals of the study were:

BETTER UNDERSTAND

the postpartum and breastfeeding experiences of new moms

DETERMINE

if Majka's products contributed to an increase in breast milk supply and, if so, by how much

GATHER

Gather overall feedback on Majka's lactation bites and lactation protein powder

our results

NEARLY

3/4

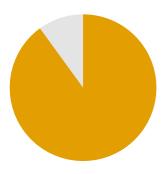

of moms who tested Majka's products noticed an increase in their breast milk supply

AVERAGE

1.29 OZ

average reported increased production per session

POWDER TESTERS

90%

experienced increased energy levels

94%

Rate Majka higher than other lactation support products on nutritional benefits

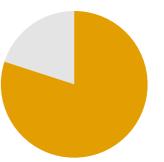

BITE TESTERS

MORE THAN

60%

experienced increased energy levels

80%

of moms rate Majka's nutritional benefits highly WHAT OUR TESTERS

Auto Say

INCREASED ENERGY

"I definitely noticed an increase in energy, which is hugely helpful when wrangling a 2 month old baby!"

- PROTEIN POWDER TESTER

BETTER MOOD

My mood seemed to be better

- BITES TESTER

PEACE OF MIND

I felt good knowing I was getting the nutrition I needed. Plus my baby was getting it too!

- PROTEIN POWDER TESTER

BETTER COGNITIVE FUNCTION

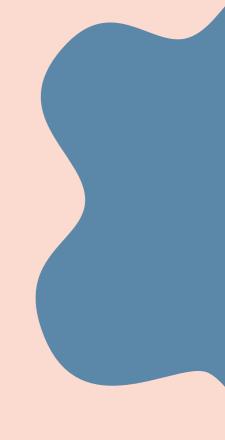

"I felt great and not so groggy and exhausted the majority of the time." most importantly

THE MAJORITY OF MOMS WOULD CONTINUE USING MAJKA'S PRODUCTS AFTER WEANING THEIR BABIES TO COMBAT POSTNATAL DEPLETION.

Thank you

These claims have not been evaluated by the FDA. Start with the foundation of eating right and hydrating well, then add Majka products to help support optimal production. Majka Products are not intended as a replacement for professional lactation support. As with any other dietary supplement we recommend you consult your physician or lactation consultant before using the product.
