- 1 x Packet of Grass Seeds
- 1 x Packet of Pea Seeds
- 1 x Colour Instruction Booklet

*Please Note:*

*You will need some soil or  
compost (not included in this kit)*

## Introduction

Discover the magic of nature through play with the Dragons' Tower Garden.

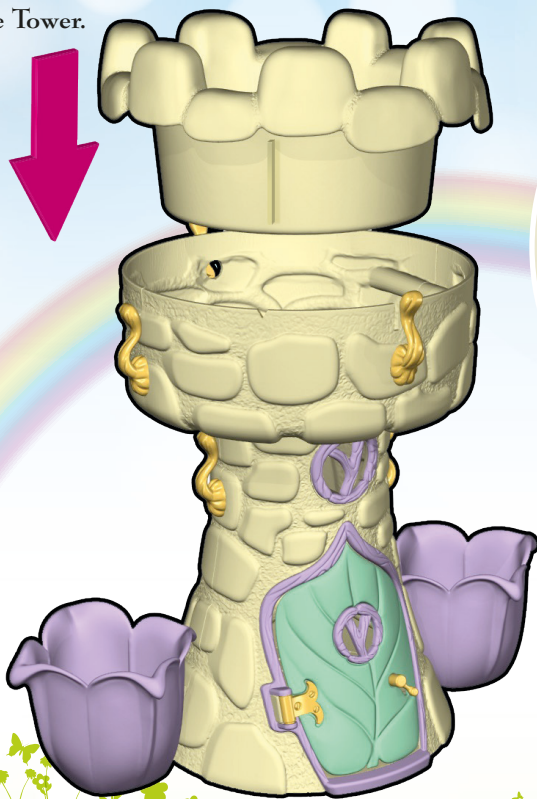

Thea's Dragon Tower is a perfect place for Thea and her dragon friends to live. The front door opens so Thea can go inside, it also has a roof-top garden where you can grow a nice soft grassy nest where Mum dragon can take care of her baby dragon. Grow pea shoots in the flower pots and loop them around the tower using the hooks. Water your garden with the dragon egg or use it to take the baby dragon with you wherever you go!

Suitable for use indoors or out. Perfect for the windowsill. Just add soil!

Find My Fairy Garden on     to enter competitions and to watch exclusive videos including demos and reviews.

# Creating Your Fairy Garden

1. Using the alignment marks, align and add the top pot to the Tower.

*Locating line on the top pot*

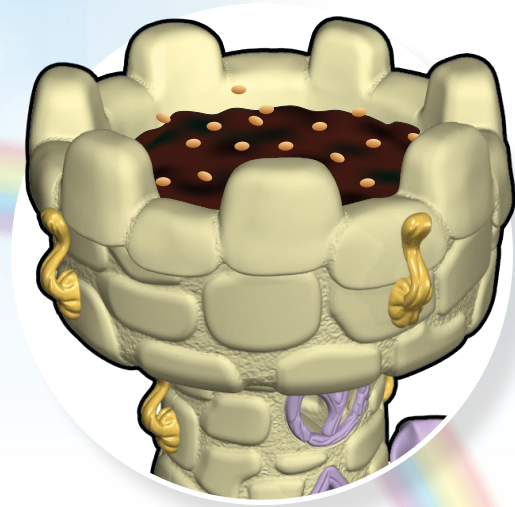

*Locating notch on the tower*

2. Fill the top pot and flower pots nearly to the top with some sieved garden soil or multi-purpose compost available from garden centres. The soil or compost should be damp but not wet. Firm down the soil.

3. Evenly scatter the grass seeds onto the top pot.

4. Gently push the pea seeds down into the soil in the flower pots.

5. Carefully water the three growing areas, trying not to overwater. You can use the egg to water these areas if you like.

# Caring for your Dragons' Tower Garden

Depending on the temperature, your plants will take a few days to start growing. Place the garden in plenty of light and check every day to ensure that the soil does not dry out. If you keep your Dragons' Tower Garden outdoors, bring it indoors during high winds, heavy rain or throughout winter.

## Caring for your Baby Dragon

Help the Mummy dragon to love and care for the baby dragon. You can keep him with you in his egg, and the top of the egg clips on and off.

## Enjoying Your Pea Shoots

Your pea shoots will be ready to eat when they have grown to approximately 10cm tall. Cut them with scissors (an adult should help you with this), wash them under cold water and eat them as part of a salad or in sandwiches.
