

Keel Pendant Installation Instructions

Only qualified persons should assemble the luminaire. If in doubt, consult a suitably qualified person. Installation MUST be carried out in accordance and compliance with current building regulations.

All Tom Raffield Pendants have been designed to fit an existing E27/ES (Edison Screw) fitting and the optional E27 ceiling kit provided. This must be installed by a qualified electrician before following the instructions below. Separate ceiling kit installation instructions are provided. If you are fitting to a B22/BC (Bayonet Cap) you will need a shade ring reducer/adaptor which we can supply.

Ensure the electrical supply is turned OFF at the fuse board.

1. To fit the lampshade to the ceiling kit, unscrew the shade ring (A) exposing the thread of the lamp holder. Sandwich the wooden disk (B) of the lampshade between the lamp holder and shade ring and tighten to ensure the shade is held securely.
2. Screw in the light bulb provided. The Keel Pendant has been designed to work with an **LED** bulb, up to a maximum of **6.5 Watts**. ***
3. Turn the power supply on to complete installation.

*** This lampshade must be used with the light bulb supplied. If the bulb should need replacing, it must be replaced with an **LED** bulb of equal size (**Ø45mm x H76mm**) and power output (**6.5 Watts**).
