

Control your drawing edges with this enchanting Fairy in 5 easy stages

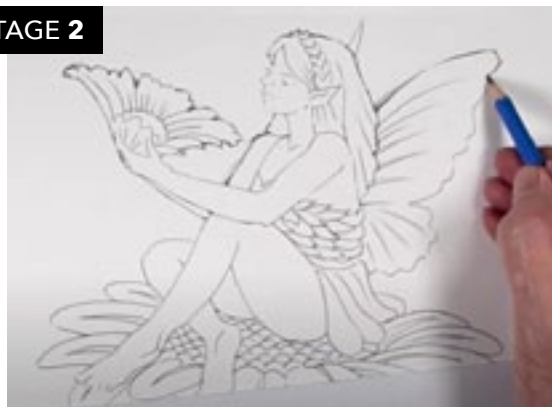

STAGE 1

Begin your drawing by outlining in a smooth cartridge paper. A thin and hard edge gives an object a solid border.

STAGE 2

Using the **2B** pencil, add more form to your drawing by carefully defining the edges, emphasising key areas with heavier marks.

STAGE 3

Continue working around the edges of your drawing, lightly shading as you go. Concentrate now on the head area, continuing down through the body. Strengthen and define the edges with minimal infill shading.

STAGE 4

Gently work into the facial zone. Now lightly shade and hatch the entire drawing without concentrating on any particular area. Holding the pencil away from the tip, lightly shade with sweeping movements.

STAGE 5

Almost there! Use a paper blender to give a smooth quality to your drawing, see how you can blend the soft pencil linework to give a shadow effect. Now we have completed the 'Control Your Drawing Edges' video.
