

single bike horizontal wall mount rack

Assembly instructions RS5701W

- 1** Locate stud beneath wallboard.
Mark position on wall at desired height.
- 2** Assemble front plate and arms against back plate to a secure fit.

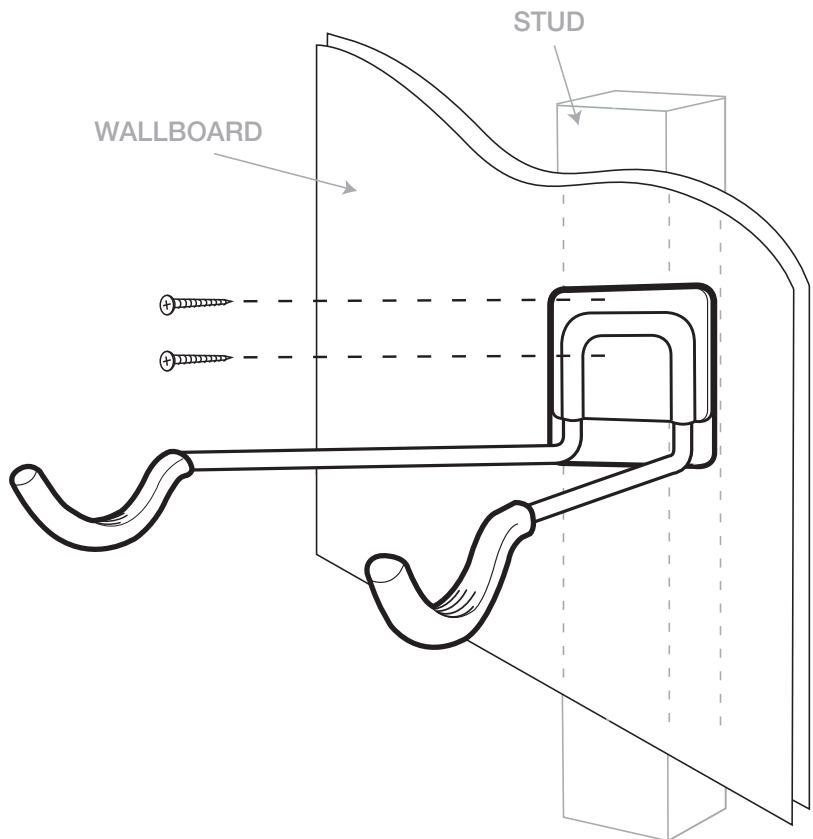

- 3** Mount securely to wall.
(screws should be in center of wall stud)

IMPORTANT SAFETY NOTE

Beware of drilling into electrical wire or pipes within wall!

WARNING

Do not exceed maximum total weight limit of 22kg/50lbs. Incorrect wall mounting could result in items falling and injury to persons. Avoid mounting in a position where personal injury could result from walking into protruding rack.
