

## **Stargaze™ EVO-X Folding Reclining Chair Setup Instructions**

### **Set Up:**

1. Remove the chair from the carrying case.
2. Unclip and remove the compression strap.
3. Grasp the upright poles, one in each hand, and lift the chair off the ground.
4. Spread your arms apart to fully expand the frame and return it to the ground.
5. Before proceeding, confirm that both locking pins are fully engaged. No red should be visible on either pin when they're fully secure.
6. If red IS visible, place your foot on the top of the hub on that side and pull up on the corresponding upright pole.
7. When no red is visible, flip up the seat back and enjoy!

### **Pack Up:**

1. Stand in front of the chair, facing the seat.
2. Fold down the chair back toward you, grab the handle on the back of the seat and pull up and away from you.
3. Pull up on the release strap to guide the frame back into its folded position.
4. For a neat roll-up, wrap the chair back around the folded frame and secure in place using the included compression strap.
5. Complete the process by sliding the carrying case over the top of the chair and roll the top closed, securing with the buckle.
