- 1** Place uprights against located stud on wall and mark location for holes. Ensure uprights are horizontally aligned. Drill pilot holes. Then secure uprights to wall using bolts provided.

**IMPORTANT SAFETY NOTE**  
Beware of drilling into electrical wire or pipes within wall!

- 2** Position arms as desired. (Arms can be positioned in 2" height intervals for maximum storage capacity). Secure with pin and spring clip.

**EXPANDABLE OPTION:** Two connecting spacers (Part E) are included to connect to another set of racks for extra height and storage.

#### WARNING

Do not allow children to play or hang from Rack  
Maximum weight on properly installed rack 480 lbs (218 kg)  
total 160 lbs (72.5 kg) per tier

**Service:** Please do not return to store;
