How to Stuff the Carry Bag

What's Included?

Our gear is built for life. Activate your lifetime warranty by registering your product at kammok.com/register.

Designed in Austin, Texas
Made in China

WARNING MAXIMUM WEIGHT 400 LB USE HAMMOCK STAND WITH CAUTION. INHERENT RISKS EXIST. Before every use, fully inspect the hammock and stand for snags, fraying, construction, defects, and general wear and tear. If anything suspicious is found during inspection, discontinue use immediately and contact the Kammok team with questions. Always make sure to clear the area beneath your hammock. Inspect for objects above hammock that pose risk of falling (e.g. dead tree limbs.) Under no circumstances should you hang your hammock more than 18 inches off the ground. Always test the hammock stand to ensure it is setup correctly before putting your full weight into it. Activities other than reclining can result in injury. Do not permit children to use unattended. Do not jump or swing aggressively in hammock while using your hammock stand. Always follow provided instructions. Do not modify the stand or hammock in any way; modification may result in failure or injury and will void your lifetime warranty.

1 Attach Legs

Attach a leg to each side of the arm.
Repeat on the second arm.

TIP How to use the snap buttons...

2 Add Middle Bar

Choose the short or long middle bar to attach to both arms. The setup process moving forward is the exact same either way.

LONG BAR: Recommended for sleeping, lounging, and multiple people at once.

SHORT BAR: Recommended for tight spaces, indoor use, the office, campfires, and naps.

3 Clip in Hammock

Clip the hammock into the teacup sliders, ensuring that the hammock is fully wrapped within the U-shaped cradles at the ends of each arm.

4 Adjust to Perfection

Adjust the teacup sliders on each arm to find your perfect hang.

Make sure the pin snaps in a hole. If you feel the pin sink down you did it right!

Enjoy the hang!

Packing Down the Swiftlet

To pack down, follow the instructions above in reverse. Refer to "What's in the Bag?" on the other side to see how to pack the parts back into the bag.
