

DOMAINE DE L'ESTAGNÈRE ROSÉ

IGP Cité de Carcassonne

PRODUIT EN CONVERSION
VERS L'AGRICULTURE BIOLOGIQUE

Heritage

Winemaker's note

Jewel of Languedoc, in the south of France, the City of Carcassonne is classified as a World Heritage Site by UNESCO. This medieval city, built during the 13th century and with an international reputation, attracts millions of visitors every year. It is the fairy-tale theater of the famous fireworks of July 14th.

The vineyard is located at the foot of the medieval fortress, between the Pyrenees to the south and the Montagne Noire to the north. It benefits from a Mediterranean climate thanks to the altitude and the oceanic influence of the Atlantic.

Winemaker's note

Creating a wine without the use of sulfites requires specific knowledge, technical skills and special attention during the winemaking process. The grapes are harvested before daybreak, when the temperatures are at their coolest, and transported to the winery. The pressing is carried out without oxygen in order to preserve the aromas. The pressing is gentle with a selection of the runners. The winemaking is processed at 18°C to maximize the varietal aromas. A malolactic fermentation is carried out.

Tasting notes

This wine presents a deep salmon color.

On the nose, it reveals very fruity notes of wild strawberry and English sweets.

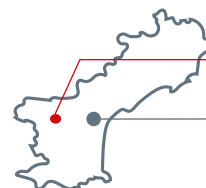

Long finish on the palate with a nice structure.

A fresh, fruity wine to be served at 10 - 12°C as an aperitif or with shellfish or fish.
