

MUD LED Interior Lamp Fitting Instructions

Front Interior Lamp

1. Prise off the interior lamp lens with a small screwdriver.
2. Remove the two 8mm nuts from the lamp base.
3. Disconnect the main wiring harness from the lamp. Unplug the earth terminal from the base plate and remove the metal base plate from the vehicle.
4. Connect the wires on the MUD LED Interior Lamp into the corresponding colour wires on the interior lamp wiring harness.
5. Position the MUD LED Interior Lamp over the interior lamp aperture in the headlining.
6. Fix the MUD LED interior Lamp in place by screwing the four self-tapping fixings into the headlining.

Rear Interior Lamp

1. Remove the rear interior lamp as per previous instructions
2. Position the MUD LED Interior Lamp onto the mounting plinth and connect the wiring into the corresponding colour wires on the interior lamp wire harness.
3. Position the MUD LED Interior Lamp on the roof lining and fix in place using the four longer self-tapping fixing screws supplied with the plinth.

Universal Fitting with on/off switching

Connect the Purple wire to a live/positive feed.

Connect the Black wire to earth/ground.

To add a door switching function connect Purple/White to a door pin switch.
