

Mawnan Planter Installation Instructions/Care Guide

The Mawnan Planter has been designed to be a beautiful addition to our popular Green Range, a selection of hanging and floor standing planters. The bowl is finished in the same beautiful Engobe glaze as our Merryn and Morvah planters but features a flat base so it can be stood on a table top surface. We have also included a length of cord should you prefer to hang the planter.

To hang the planter -

1. Identify if there are any hidden pipes or electrical cables in the ceiling to avoid causing damage or risk of electrical shock during installation. Drill a pilot hole and screw a cup hook (not supplied) into a suitable, structural surface (A). **The surface must be capable of supporting the estimated planted weight of the Mawnan Planter (3kg).**
2. Double up the cord and thread the looped end under the wooden strap and push the two loose ends through the loop to create a Cow Hitch knot (B).
3. Double up both ends of cord and then tie a figure eight knot connecting the two lengths of rope together in the same way as detailed above (C) and place it over the cup hook (A).

- Caring for the earthenware bowl

We have designed striking earthenware bowls for our Green Range featuring a hard-wearing glaze on the inside and a unique matte glaze on the outside, known as Engobe. We suggest you clean both the interior and exterior surface of the pot by gently wiping away any marks using warm soapy water and a lint free cloth. Once the pot is clean, gently dab dry using a soft, lint free cloth or towel. Any fibres on a cleaning cloth will stick to the outside surface more easily due to its beautiful finish.

- Caring for the wooden structure

Dust the planter with a soft, dry, lint free cloth. Mild furniture polishes can be used on the wood. The bowl can be easily removed from its wooden holder before planting. When watering the plant in place, simply wipe away any surface moisture or water straight afterwards to minimise the chance of water stains.

- Caring for your plants

Always refer to the care guides and planting guidelines supplied with any plant or seed you've chosen. The Green Range earthenware bowls do not have drainage holes in the base, therefore suitable drainage must be added.
