

TTP030MF-RTC

Lightweight cut resistant MF nitrile palm coated glove

The 030MF is one of our newest cut resistant gloves in the range. With a soft, Hi-Vis Orange cut level A4 shell, it is ideal environments where protection and visibility are key. The seamless knitted shell provides a close fit for picking and fitting small pieces and parts.

The tough and durable construction complimented with a microfinish nitrile palm coating provides high cut and abrasion resistance making it also suitable for construction, utility workers, glass handling, automotive and general assembly.
