WHY iPONIC SERIES?

- Increase Yields, Crop after Crop
- Save Money with Lower Electricity Bill
- Lower Your Risk of Losing a Crop
- Make More Money from Your Crops

iPONIC COMMERCIAL (UL Listed)

When it comes to your climate, you should be in control. And that is exactly what the iPonic Commercial allows you to do. This integrated contactor panel makes it easy to transition from the controllers and thermostats of the past and step boldly into the future where the climate can be finely tuned to your unique specifications.

CONVENIENCE AT YOUR FINGERTIPS

The iPonic Commercial is designed for your convenience – pre-mounted, pre-wired, and pre-tested. Pre-mounted means an easier and cheaper installation process with no need for separate boxes with conduits in between. Pre-wired means it works as soon as you take it out of the box. And pre-tested means we have double and triple checked everything before it even arrives at your facility.

THE COMPLETE PACKAGE

All this is available at a lower cost than any other control system on the market. Plus, it is easy to operate and modify the controls, either on site or remotely. You can instantly access your controls from anywhere by downloading data wherever you have an internet connection. And it works 24/7 so you always know just what is going on, day or night.

SENSORS INCLUDED

- CO₂
- Temperature
- Humidity
- Light
