Manufacture Details Hand knotted - Tibetan knot

Country of Origin India

Pile Height 10 - 11 mm

Custom Production Lead-time 16 - 20 weeks + local freight lead time

Suitability Indoor, residential & light commercial

Size Blue 180 x 300 cm, Moss 200 x 300 cm, Natural 200 x 300 cm,

\*No custom sizes available

The Pebble Collection takes its inspiration from the nature around us. In particular the curved organic shapes of pebbles in a stream, glimmering in the sunlight and being smoothed over time by the water. Designed by Jardan Lab, each of the three designs are unique, individual shapes with coloured segments overlapping and creating layered tonal colour.

Available in Moss, Natural and Blue.

### Care Instructions

#### Spot Cleaning

Treat any liquid spills immediately. Place a clean cloth or unprinted paper towel directly on the liquid to absorb the spill. Following this use a clean cloth, dampened with water and dab the affected area, do not follow a circular motion, simply dab and blot. Absorb any excess moisture after cleaning with a clean dry cloth or towel. For dirt marks, such as soil, simply allow the soil to dry and vacuum. If spills or marks remain, contact a professional rug cleaning specialist.

#### Professional Cleaning

After time your rug will require professional cleaning. Any persistent or large stains will also require professional cleaning. Do NOT dry clean or steam clean rugs. Each Jardan rug is unique, and made of different fibres, we recommend contacting a professional rug cleaner who specialises in hand made rugs or contact Jardan for a recommended specialist cleaner.

#### Shedding & Lose Fibres

All rugs may shed and have loose fibres. Shedding will take place mostly in the 1-6 months of the rugs lifetime, but will slow over time. High traffic areas may always have a small amount of shedding. Simply vacuum any shedding fibres. For loose threads or ends - do not pull, simply clip them carefully with fabric scissors.

#### Care & Maintenance

The positioning of your rug will have an effect on the longevity and appearance of your rug over time. Avoid direct and continuous exposure to sunlight. Vacuum regularly to prevent dust and crumbs from settling into the pile. Rotate rug occasionally to equalize wear.
