

GP-FB599

Insulated Hi-Vis Pigskin Glove

The GP-FP599 Insulated Grain Pigskin Work Gloves are perfect for cold environments.

Premium grain pigskin protects the palm, index finger and thumb with exceptional durability. The glove remains soft and flexible even after getting wet.

Moisture managing thermal insulation keeps hands warm.

On the back of hand, High visibility Orange nylon fabric with Yellow retro-reflective striping promotes a flexible range of motion and improves wearer visibility in low-light situations.

Polyester elastic knit wrist keeps debris & wind out. The cuff also has an integrated leather pull tab to avoid stretching the knit.
