Suitability Indoor, residential & light commercial

Size 200 x 300 cm, 275 x 365 cm, 300 x 400 cm, Custom sizes available (Maximum size 650 x 1200cm)

Inspired by the eucalyptus tree, Snowgum takes its dusty tone and texture from the iconic Australian native, which sheds its outer bark to expose layers of blue, grey, white and reddish-pink bark. Woven in India using a hand knotting technique, Snowgum is crafted from a blend of 90% New Zealand wool and 10% silk.

Care Instructions

Spot Cleaning

Treat any liquid spills immediately. Place a clean cloth or unprinted paper towel directly on the liquid to absorb the spill. Following this use a clean cloth, dampened with water and dab the affected area, do not follow a circular motion, simply dab and blot. Absorb any excess moisture after cleaning with a clean dry cloth or towel. For dirt marks, such as soil, simply allow the soil to dry and vacuum. If spills or marks remain, contact a professional rug cleaning specialist.

Professional Cleaning

After time your rug will require professional cleaning. Any persistent or large stains will also require professional cleaning. Do NOT dry clean or steam clean rugs. Each Jordan rug is unique, and made of different fibres, we recommend contacting a professional rug cleaner who specialises in hand made rugs or contact Jordan for a recommended specialist cleaner.

Shedding & Lose Fibres

All rugs may shed and have loose fibres. Shedding will take place mostly in the 1-6 months of the rugs lifetime, but will slow over time. High traffic areas may always have a small amount of shedding. Simply vacuum any shedding fibres. For loose threads or ends - do not pull, simply clip them carefully with fabric scissors.

Care & Maintenance

The positioning of your rug will have an effect on the longevity and appearance of your rug over time. Avoid direct and continuous exposure to sunlight. Vacuum regularly to prevent dust and crumbs from settling into the pile. Rotate rug occasionally to equalize wear.
