***Twists:** 2.5 oz (70 g), 121 yards (111 meters)*

**GAUGE:**

Exact gauge is not essential to this project.

**PICTURE FRAME**

**Front of Frame**

With ruler and pencil, draw lines to create a 'box' shape at each corner of frame.

Apply glue to one box. Adhere the end of a strand of A to center of glued area, then coil A into a spiral to fill the box. When finished, trim the end of A and glue in place. Repeat to make a box on each of the remaining corners.

Allow to dry.

Apply glue to one side of frame, between 2 of the corner boxes. Wrap glued section with C, wrapping all the way around the frame. Glue ends of C to back of frame.

Repeat to cover remaining sections of frame between corners.

Allow to dry.

**Side edges of Frame**

Apply a small amount of glue to one side edge of frame, then adhere strands of C to cover. Trim ends of C and glue in place.

Allow to dry.

Cut eight 12 in. (30.5 cm) strands of B. Apply a small amount of glue to center of one corner box on frame. Coil strand into a small circle, applying glue as needed, then glue end in place.

Repeat to make another small circle of B on inside corner of box shape.

Repeat on remaining corners of frame.  
Allow to dry.
