GAUGE:

Three 3-dc groups + 6 rows = about 5 in. (12.5 cm).

When you match the <u>gauge</u> in a pattern, your project will be the size specified in the pattern and the materials specified in the pattern will be sufficient. The needle or hook size called for in the pattern is based on what the designer used, but it is not unusual for gauge to vary from person to person. If it takes you fewer stitches and rows to make your swatch, try using a smaller size hook or needles; if more stitches and rows, try a larger size hook or needles.

Making a Gauge Swatch

NOTES:

1. Afghan is made in one piece, in 2 Triangles.

2. First Triangle is worked from point to point. Sts are increased on one side to center. Then sts are decreased on the same side to the opposite point.

3. First row of Second Triangle is worked along long edge of First Triangle. Sts are decreased on each side to top point.

4. A diagram is included to show the direction of work.

5. The yarn color is changed every 2 rows to make stripes.

6. To change yarn color, work last st of old color to last yarn over. Yarn over with new color and draw through all loops on hook to complete st. Proceed with new color. Fasten off old color.

7. A border is worked around the entire outside edge of the Afghan.
