NOTES

1. The Wrap is made in 2 sections: Fronts/Upper Back and Lower Back.
2. Fronts/Upper Back section is worked first. Sts are then worked along one long edge of Fronts/Upper Back for the Lower Back.
3. Two different cable patterns are used in each section. We found that after working just a few rows, it was easy to determine where each pattern should be worked. If you like, place a st marker between each of the patterns to keep your place.
4. When working post stitches, you are inserting the hook around the vertical bar of the stitch instead of under the top two loops of the stitch. The side of the work that faces you is the "front", and the side of the work that faces away from you is the "back". For example, to work a FPTR, work as follows:
 - a. Yarn over the hook twice (3 loops on hook).
 - b. Insert hook from front to back to front around post of indicated st, as follows:
 - i. Insert hook from front to back into the space between sts that is immediately before the indicated st.
 - ii. Continue to bring the hook behind the indicated st, and insert it from back to front into the space between sts that immediately follows the indicated st.
 - c. Yarn over and draw the loop all the way back around the post of the st to the front of the work and up to the level of the sts in the current row (4 loops on hook).
 - d. (Yarn over and draw through 2 loops on hook) 3 times (1 loop remains on hook)
 - e. Take care to skip the 2 loops at the top of the st into which you would usually work and are now "behind" the post st you just completed.

5. When you see 'work in pattern as established' in the instructions, this means to work the next row of the pattern sts, lining up sts as in previous rows.
