

## Karaka Washable Biogarde Gown L/S

MX0105

Sometimes you just need to grab a gown to put over your clothes - just to protect yourself. Fits comfortably over clothes - the open back design allows you to move freely. It's not as cumbersome as a fully wrap around gown and is more popular accordingly. You pull the gown on from the front - the top of the gown closes securely with a velcro shoulder panel and the adjustable waist band can be secured to fit. High neckline, cuffed long sleeve, and knee length for maximum protection.

We've selected the Biogarde fabric for this gown as its comfortable for wearing next to your skin for long periods and is easy to launder. Perfect for your protection in laboratory and medical settings.

BIOGARDE™ destroys microbes that come into contact with the fabric by disrupting the cell wall of the microbe - suffocating and sterilizing the cell.

The treatment creates a permanent, embedded and non-leaching coating of silver particles onto fibre. Because it is durably bonded to fabric, it is stable, non-soluble and washer/drier-resistant.

- Adjustable waistband and self fabric tie
- Long sleeve with cuff
- Long length for below knee coverage
- High neckline
- Velcro shoulder panel for closure
- Popular Polyviscose fabric is easy care
- Biogarde
- Unisex fit
- Made in New Zealand
