Blood Proof Washable Gown Long Sleeve

MX1052

These full front coverage gowns are made from a unique blood proof fabric developed for use in the dental sector. You pull the gown on from the front and close it with 2 fabric ties at the back which allows for flexibility across shoulders due to the contoured back shaping. The wide neckline means you can wear your choice of scrubs or clothing under the gown, and the lightweight fabric won't weigh you down!

This gown is constructed from a medical grade fabric which is commercially launderable and repels blood. The gown's long sleeves and below knee length will protect the wearer from the grime and slime you often encounter in surgery.

Composition: 100% polyester.

- Blood Proof Fabric
- Anti Static fabric doesn't attract hair and dust
- Lightweight gown for comfort on the job
- Commercially launderable
- Long Sleeves
- Long length for below knee coverage
- Contoured back aperture with 2 fabric ties:
