THE IR ENERGY DIFFERENCE

- Superior craftsmanship, efficiency with a modern, sleek design
- Lowest profile in the industry
- Both gas and air modulated at both inputs for a TRUE two-stage heater – saving energy and increasing performance
- Enclosed flame completely protected from wind, creating the highest wind resistance
- Dual input from 23,000 BTU/hr to 100,000 BTU/hr
- Effective for ceiling heights 9' to 16'
- Both indoor and outdoor applications available
- Available in 316 marine grade stainless providing the best quality in the industry
- Every heater is factory tested and inspected prior to shipping
- More intense and even heat footprints ranging from 192ft² to 672ft² (see illustration below)

For illustrative purposes only.

REFLECTOR COMPARISON

COMPETITOR

FREQUENT IMPINGEMENT
= HIGH TOP CLEARANCE & LESS HEAT OUTPUT

Infrared energy is frequently directed back to the heat source (tube) rather than the patrons below due to a less efficient reflector design

evenTUBE®

0% IMPINGEMENT
= LOW TOP CLEARANCE & MORE HEAT OUTPUT

All infrared energy is directed efficiently to the patrons below - Best Reflector Design in the Industry!
