

CONGRATULATIONS FOR YOUR BLUGUITAR® TWINCAB!

TWINCAB™

Its compact design and light weight of less than 20 kg enables convenient transport with only one hand. Configured for horizontal or vertical operation with rotatable logo, this compact 2x12" cabinet is an ideal partner for the **BluGuitar® AMP1™**, lunchbox amps and "classic" 100w heads.

TWINCAB™ can be operated in both mono and stereo with its tonality characterized by accurate bass, warm and full mids, as well as soft highs with balanced frequency projection.

The closed back design with two bass reflex openings at the front give the cabinet extra low end response while the basket weave front cloth works like a filter that reduces harshness ensuring silky high frequencies. Depending on the way of operation you get two different sound characters featuring either more bass or mids.

The „**BG-12 Special**“ speaker specifically developed for the **TWINCAB™** is harmoniously tuned to the reinforced birch multiplex housing. **TWINCAB™** comes complete with a robust, padded protective cover.

TONE INNOVATION

Connecting TWINCAB to an amplifier

TWINCAB™ has a **MONO INPUT** and **two inputs** that can be used alternatively for **STEREO**.

Mono operation

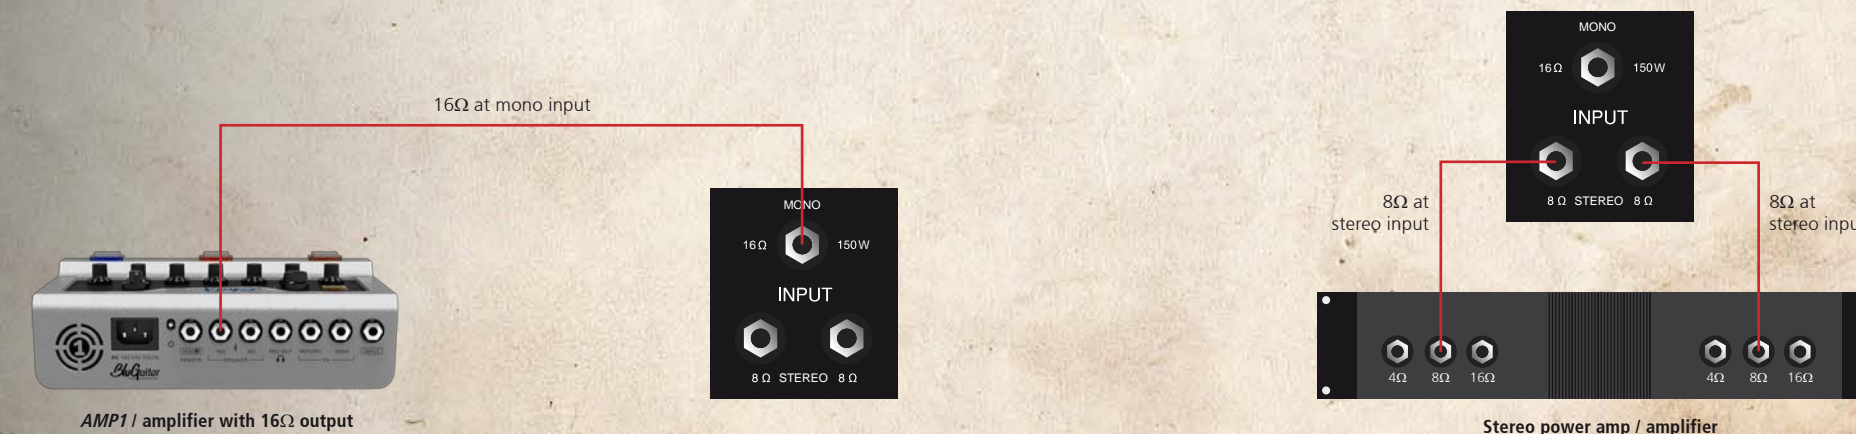

When using the **MONO INPUT**, both speakers are active, delivering **150 watts** at **16 ohms**. That gives you enough headroom for maximum power driven by **AMP1™** or any other classic tube amp. Mind that the 16 ohms output of your amplifier is connected with a speaker cable only to the **MONO INPUT** of your **BluGuitar® TWINCAB™**.

The **STEREO INPUT** sockets should not be used during mono operation.

Stereo operation

In case you want to use both speakers separately, each of the **STEREO INPUT** sockets connect to one speaker only. One speaker handles **75 watts** at **8 ohms**. Make sure that only these **2 inputs** are connected with 2 speaker cables to the 8 ohms outputs of your amp(s).

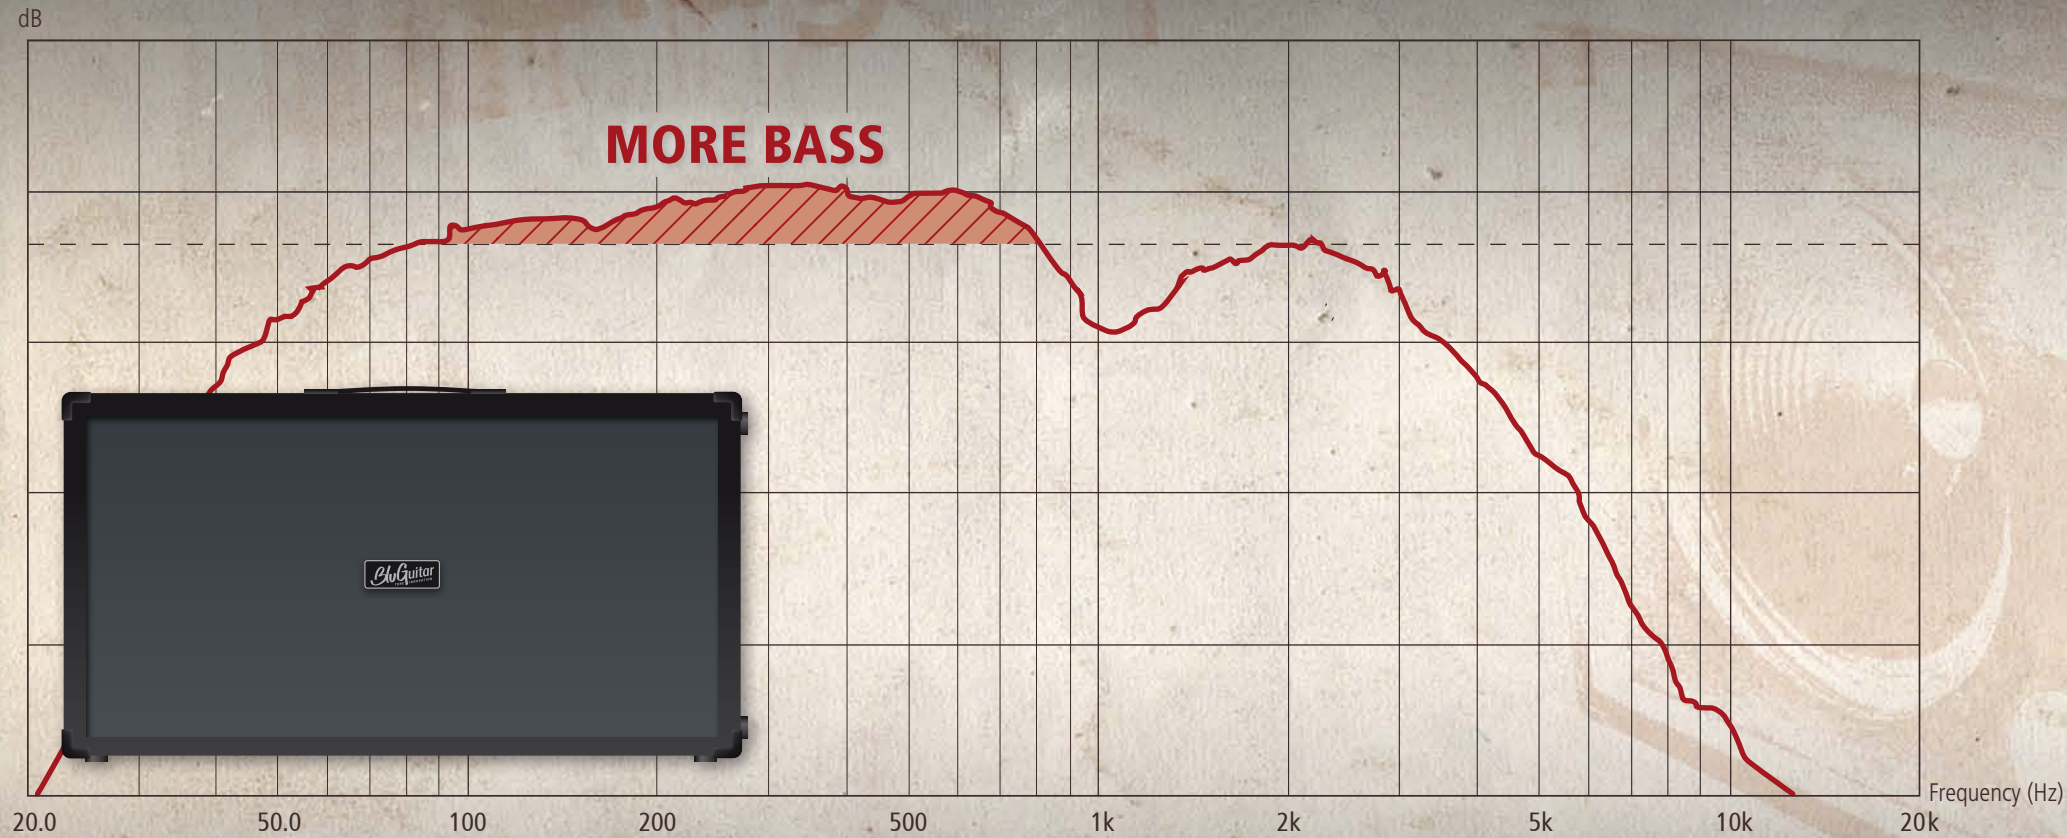

The **MONO INPUT** should not be used during mono operation.

CAUTION: Warranty is void in the case of speakers being overloaded.

HORIZONTAL

VERTICAL

TWINCAB™

Type: 2 x 12" Closed Back

Power: mono 150 Watt, stereo 2 x 75 Watt

Impedance: 16 Ohm mono, 2 x 8 Ohm stereo

Speaker: 2 x 12" BluGuitar BG12-S Speaker, Rear Loaded

Weight: 18,7 kg (41,23 lbs)

Dimensions: 40 x 75 x 33 cm (15.75" x 29.53" x 13")

VINTAGE PREMIUM SPEAKER CABLE

Type: Speaker Cable, Custom Wire

Connectors: 1/4" Nickel Plated

Length: 5,67 m (18ft 7.2in)

Sleeve: Black Tweed
