Make your car smokefree

To limit children's exposure to second-hand smoke, from 28 November 2021 it became illegal to smoke in a vehicle when there are children under the age of 18 present.

Smoking in the car is harmful to your children because:

- They will be exposed to second-hand smoke and children who breathe in second-hand smoke are more likely to develop illnesses such as chest infections, glue ear and asthma.
- Young people who have friends/family/whānau who smoke are more likely to take up smoking.

Second-hand smoke in your car

- Winding the window down will not remove all of the poisons.
- The poisons will linger long after the smoke and smell have disappeared.
- Children are often not able to move away from second-hand smoke in a car.

Second-hand smoke is a mix of smoke from the burning end of a cigarette plus the smoke blown into the air by the person smoking. It contains more than 200 poisons, some of which can cause cancer.

Easy steps to making your car smokefree

- Make a rule – your car is smokefree at all times for everyone.
- Clean out your car ashtray.
- Remove the car cigarette lighter.
- Let other people know – put a Smokefree sticker on your car window.
- Ask your family and whānau to support you by not smoking in your car.

*Be a positive role model and don't smoke around children at any time.
They'll be less likely to take up smoking.*
