# TOUCHWOOD VENEER PANELS ARE PROUD TO FEATURE IN AL & IMO'S GOOD DAY HOUSE BUILD

AL AND IMO, ARE A HUSBAND AND WIFE DUO BUILDING THEIR DREAM LIFESTYLE, ONE PROJECT AT A TIME.

Al is a carpenter turned furniture maker and Imo, a designer, on a mission to help educate and inspire young Australian families to make more sustainable choices when it comes to building and renovating.

Early on in our build, they were introduced to Touchwood Veneer Panels. The natural timber veneer, sustainability and ease-of-install ticked a number of boxes for their project.

Excited by the possibilities, Al & Imo have utilised Touchwood Veneer Panels in a number of ways throughout their stunning house build including lining the ceiling in their main living, dining, and kitchen area, using it for walls, under an island bench, a bedhead, and also applied it to our bedroom joinery doors.

Having installed close to 400sqm of Touchwood Veneer Panels, Al & Imo can speak first hand to the beauty and benefits of Touchwood Veneer Panels.

FIND OUT MORE ABOUT AL & IMO'S BUILD ON THEIR WEBSITE AND SOCIALS!

## AL & IMO RECOMMEND FIDDES HARD WAX OIL

Al & Imo have been using Fiddes Hard Wax Oil on their custom furniture builds for years. It is a product that they love and trust, and can happily recommend Fiddes Hardwax Oil in Satin was their finish of choice for Touchwood Veneer Panels in their recent house build!

# LOOKS GOOD FEELS GOOD DOES GOOD

Using natural materials in design and décor is proven to have a positive effect on wellbeing. Known as biophilic design, it reconnects people with nature, can help reduce stress and improve our emotional state.

Touchwood Veneer Panels are a way to bring native wood within everyone's reach, in more ways than one.

## SUSTAINABLE IS NOW AFFORDABLE

Touchwood Veneer Panels have been created to make the warmth and beauty of natural timbers accessible to a wider range of interior designs and budgets.

The 9mm moisture resistant MDF board backing (in natural or black) with Blackwood or Tasmanian Oak veneer face gives the illusion of solid timber VJ panelling. And the good stuff doesn't end there. It is also a sustainable product that utilises native timber veneers from PEFC certified forests.

Saving money and time on both materials and installation, Touchwood Veneer Panels can be used to transform an existing space by fixing it directly onto plasterboard or specified in new projects at scale.

## PERFECT FOR OFF-THE-WALL DESIGN

Designers don't limit their imagination to only using Touchwood Veneer Panels as a wall panelling. By combining their creativity and Touchwood Veneer Panel's easy installation and effortlessly versatile ergonomics, they use it to clad ceilings, bedheads, cupboards and counterfronts.

It is equally at home fixed vertically or horizontally; in modern interiors or more traditional settings and can be finished with wax, oil or polyurethane in matt, gloss or satin finish.

## TASMANIAN TIMBER

Touchwood Veneer Panels are made from PEFC certified Tasmanian Timber veneer pressed on moisture resistant MDF board with a vertical groove to give the appearance of solid VJ panelling. It is quick and easy to install, more cost effective than solid timber and just as beautiful. Available in Tasmanian Oak and Blackwood, it can be finished with a stain, wax or varnish.

Tasmanian Timber is sustainably grown, harvested and processed to meet the highest standards in quality and environmental practice.
