1

1. Creating the outline

Before drawing with the fineliners, begin with light construction lines.

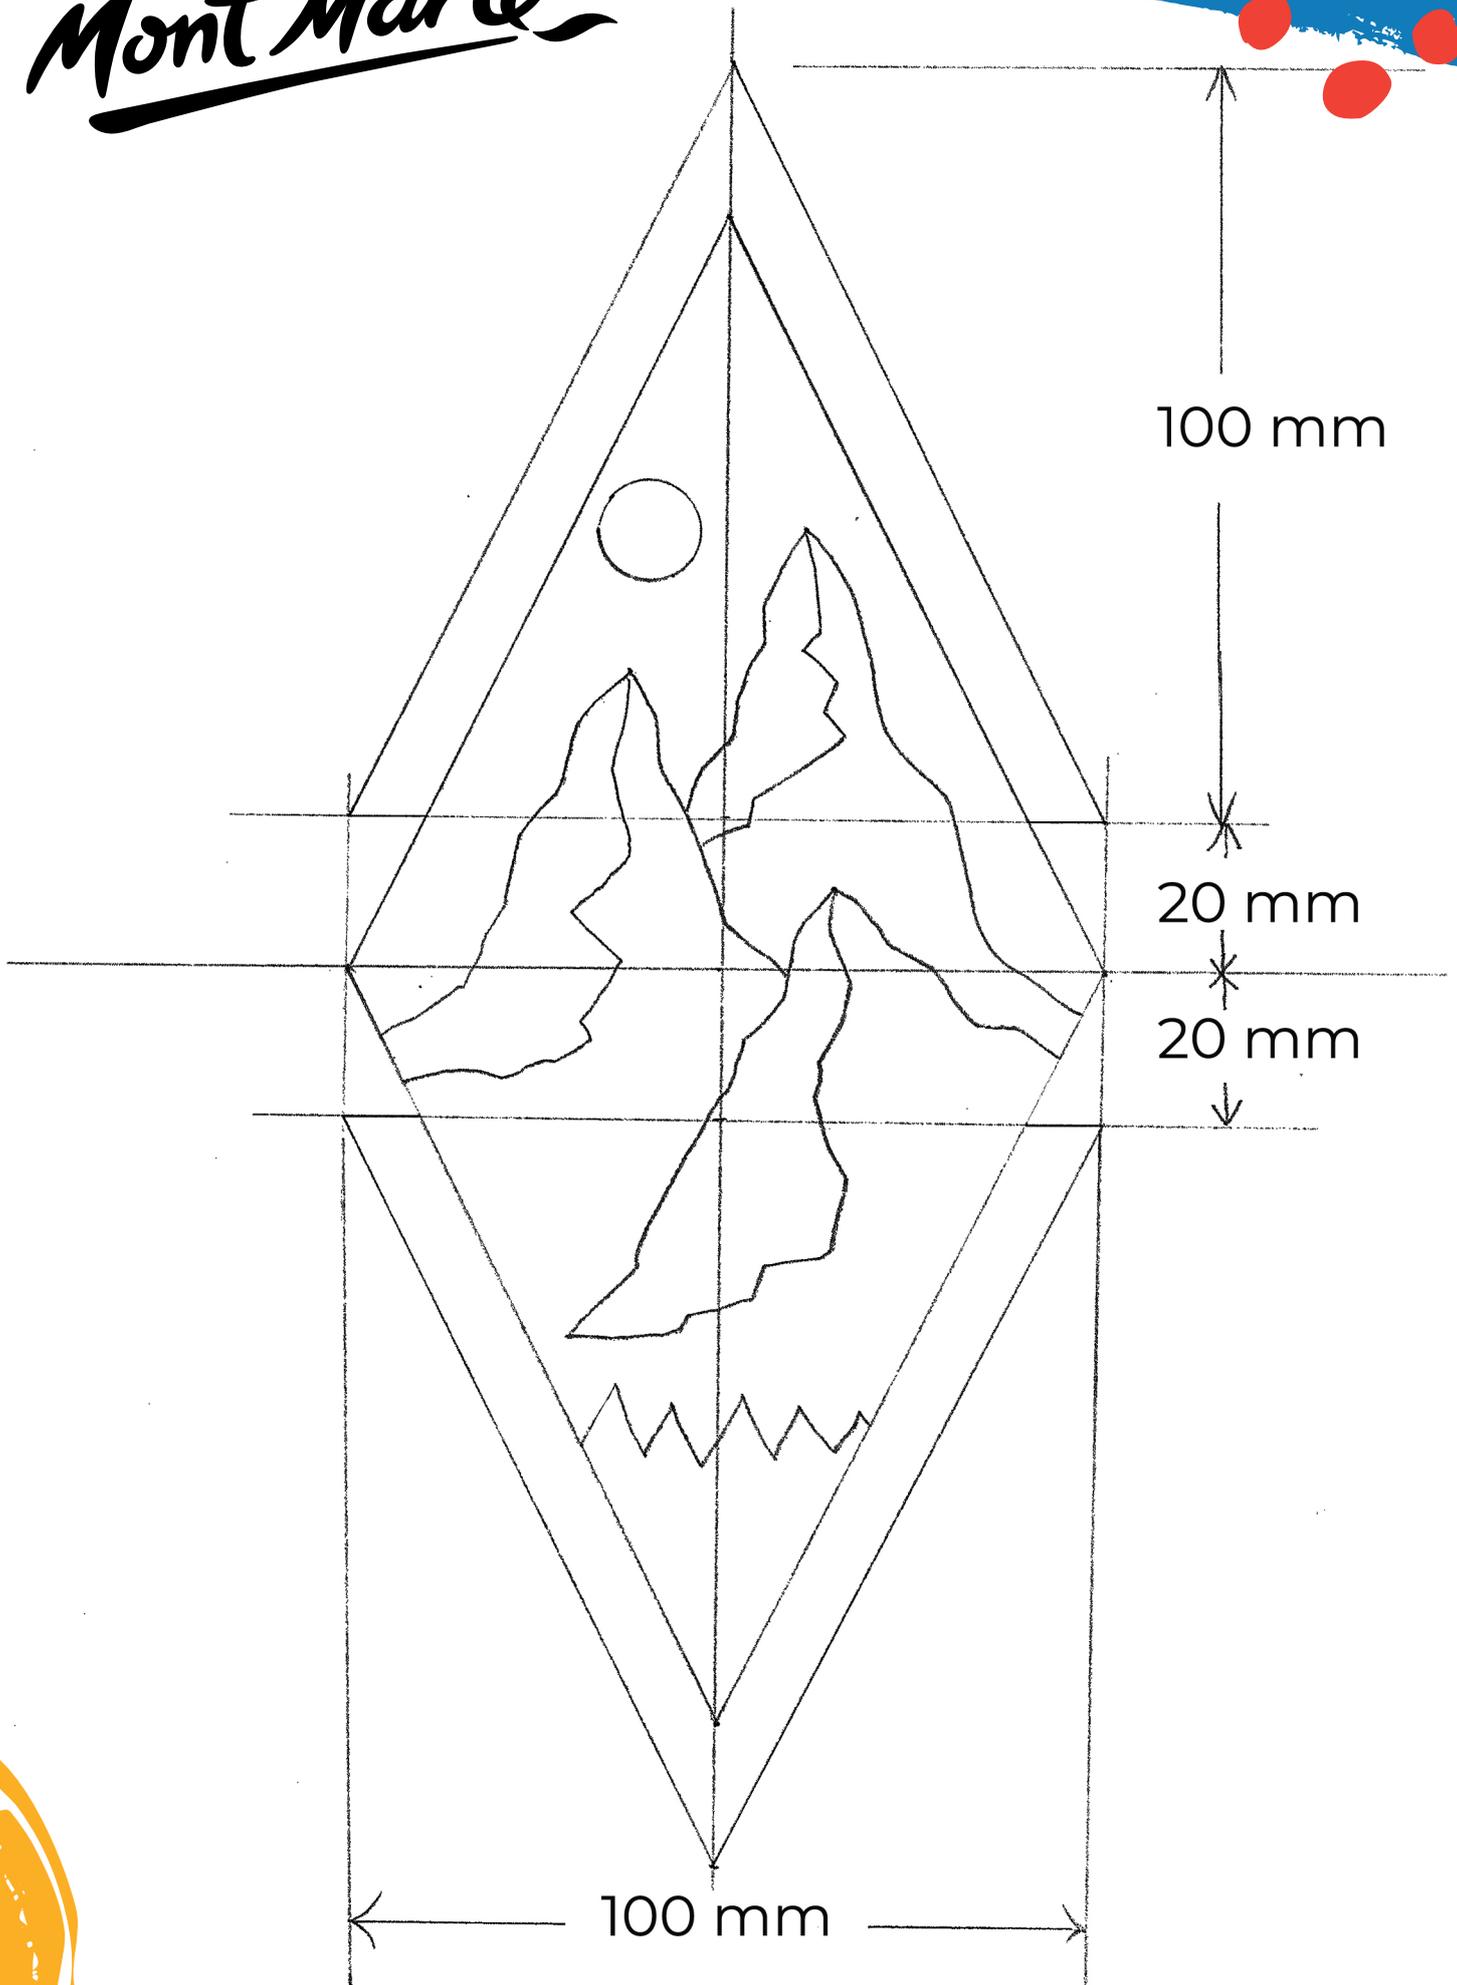

Divide the page in half vertically then horizontally. Create a line 20mm above the horizontal line and another 20mm below it.

Create a triangle with a 100mm base. Measure 100mm up the centre line and create the sides of the triangle. Follow the same steps and create a triangle below the horizontal line.

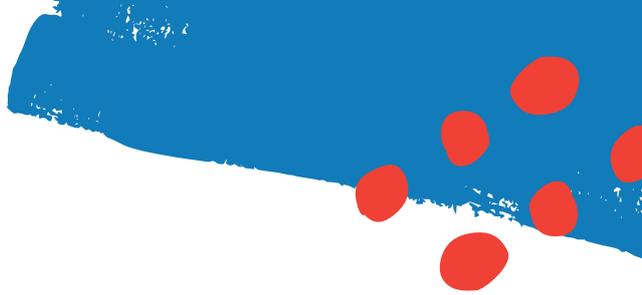

Create a triangle beneath the horizontal line following the same steps. Create another triangle over the top triangle starting at the 20mm line. Then create a triangle from the 20mm line below the horizontal line.

Draw in the mountains.
Use a small washer as a template for the sun.
Draw in the tree outlines.

2

2. Outline the mountains

Use a 1.0 fineliner to draw in the main line work of the triangles and the mountains.

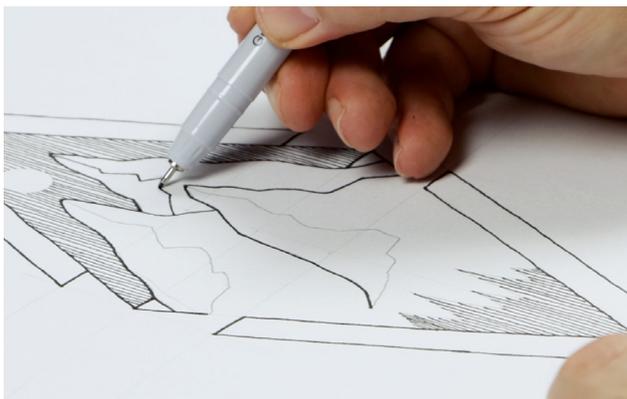

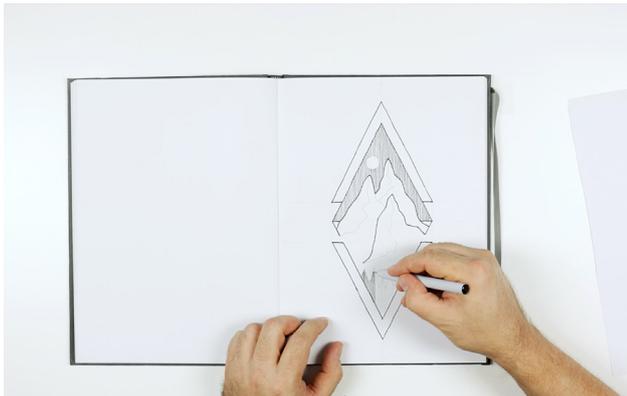

3

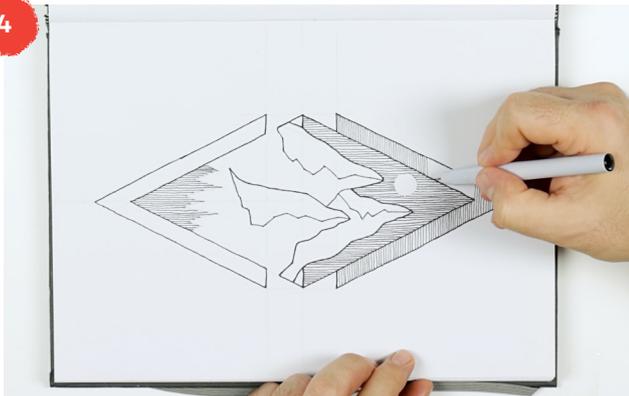

3. Creating the geometric lines

Use the 0.3 fineliner to create the vertical lines behind the mountains and in the tree area in the bottom triangle.

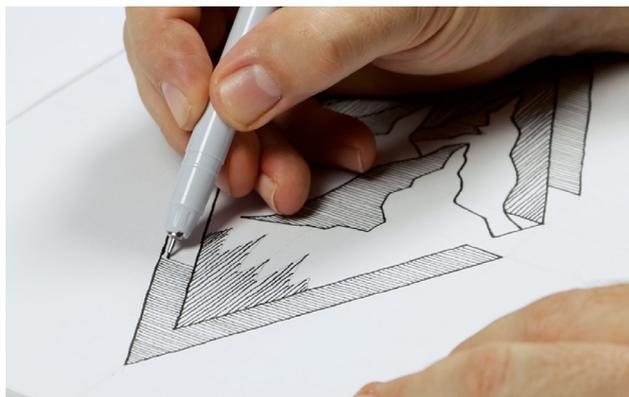

Mont Marte

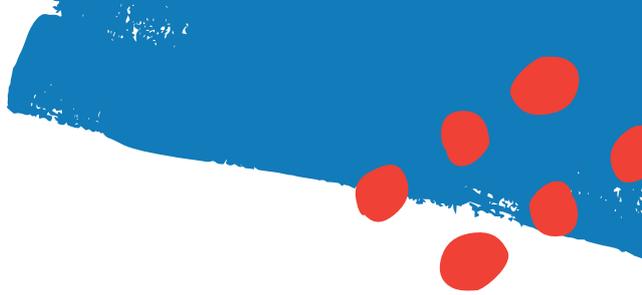

4

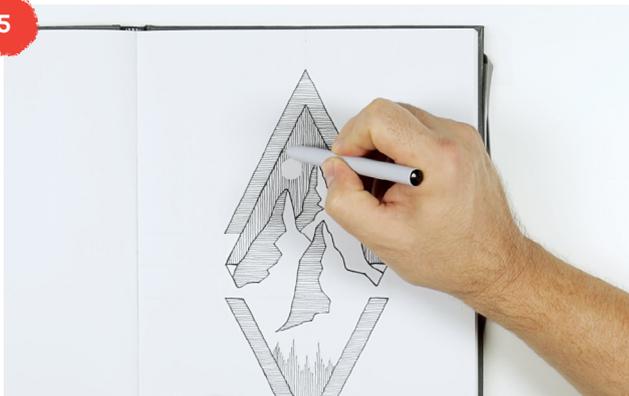

4. Finishing the lines

Turn the sketchbook sideways and then create the lines on the mountains and the top and bottom triangles.

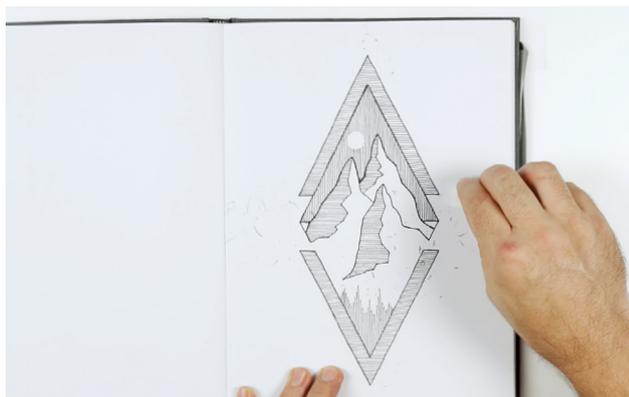

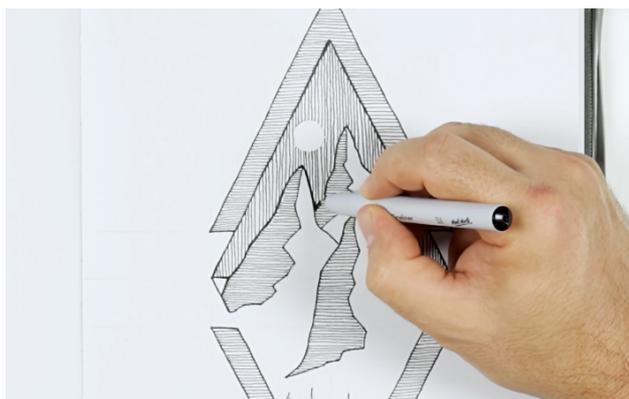

5

5. Final details

Thicken the line over the edge of the mountains. Erase any visible pencil lines to finish the drawing.
