

WORLD GEMOLOGICAL INSTITUTE™

DESCRIPTION

ONE (1) FACETED GEMSTONE. SPECIES: NATURAL CORUNDUM. VARIETY: SAPPHIRE.

Center Stone
Shape And Cutting Style **Cushion Mixed Cut**
Carat Weight **1.04 carat**
Color Grade **Blue**
Clarity Grade **Lightly Included**
Measurements **5.94 X 5.91 X 3.75 mm**

Comments
Indication of thermal enhancement.
Colour uniformity: Very good.
Transparency: Transparent.
Origin opinion: Sri Lanka (Ceylon).

WGI™ CERTIFICATE NUMBER

WGI9634173281

WGI™ Gemological Analysis is based on strict standards and internationally accepted grading techniques which the laboratories are committed to. Using professional equipment and terminology, this report represents a gemological opinion and does not serve in any case a guarantee or warranty. HPHT (high pressure high temperature) is a treatment to enhance the diamond's color. Clarity enhanced refers to laser drilling and / or fracture filling techniques to improve clarity of a diamond and its appearance. Weights and measurements are approximate. The mounting can limit the ability to see the characteristics and signs of treatment. The valuation refers to a recommended retail price (RRP).
