Wear Rating	II	Wall -Dry	Yes
Shade Variation	V2	Floor - Residential	Light
Recycled Content	Yes	Floor - Commercial	No
Finish	Crackle	Freeze/Thaw	No

**Double fired tile refers to the two stage process that these tiles undergo. The first firing is of the body or bisque, and the second firing is done to apply the glaze. This process is used to achieve the rich and deep color tones unique to it. Please consult your setting material manufacturer for the appropriate adhesive, grout, and substrate prior to installation.*

*Installation Notes : Capri can be used in showers with intermittent water however, the crackled glaze finish should be sealed and use the appropriate grout to avoid water absorption into the body of the tile. Capri is not recommended to be installed over a waterproof barrier, and the recommended adhesive is a double duty mastic, such as Mapei's Type 1.

Soft joints at all adjoining surfaces are required per TCNA standards.
