

# Holding your Graphite

## Graphite Pencil

Position your hand closer to the end of the pencil to give you more control but heavier strokes.

Gripping further up the barrel of the pencil gives less control but allows for lighter strokes.

## Graphite Stick

Grip the graphite stick about 25mm (1") from the end for better control.

Holding the graphite stick further away from the tip gives more freedom of movement but less control in detailed areas.

### Try it yourself
