Complete range

Vikan squeegees distinguish themselves not only by the high quality of the individual product, but also by the extensive range. It is our conviction that hygiene is optimized when employees have access to the tools that suit both the task and the person best. With the right tools, the job is also carried out more effectively and efficiently.

Select the right squeegee for the job

Our broad range of squeegees cover all needs for professional cleaning where hygiene is essential. The selection spans from flexible and functional models with sponge rubber to fully moulded models with double-component rubber. To achieve the highest efficiency and hygiene, it is important to use the right squeegee for the job. Replacing the replacement cassette is easy.

Please note the finger grip.

Hygienic single blade squeegee

What: Ultra hygienic fully moulded single-blade squeegee.

Where: For areas that require the highest level of hygiene.

Why: Designed to be effective in use, but also easy to clean with no hiding places for dirt and microbes. Moreover, it can be auto-claved at 121°C.

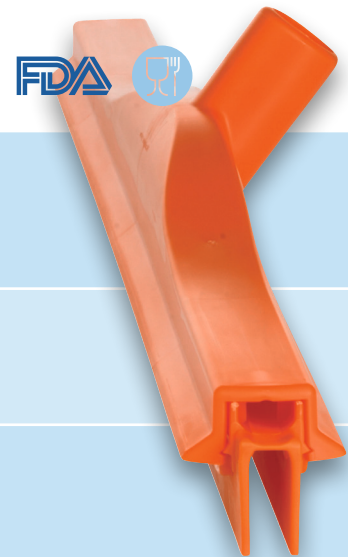

Hygienic double blade squeegee

What: A squeegee with replaceable cassette with either fixed or rotating neck.

Where: Highly effective on tiled, uneven anti slip surfaces where hygiene is essential.

Why: The unique design means you do not have to compromise between hygiene & efficiency.

Classic double blade squeegee

What: A double blade sponge rubber squeegee with replaceable cassette with either fixed or rotating neck.

Where: Areas with smooth or tiled surfaces with large amounts of liquid or debris.

Why: The most effective squeegee for removing large amounts of liquid or debris quickly and effectively.
